Step into the colorful world of Henri Matisse and his magnificent paper cutouts in this biography by acclaimed picture book creator Jeanette Winter. In a small weaving town in France, a young boy named Henri-Emile Matisse drew pictures everywhere, and when he grew up, he moved to Paris and became a famous artist who created paintings that were adored around the world. But late in life a serious illness confined him to a wheelchair, and amazingly, it was from there that he created among his most beloved works enormous and breathtaking paper cutouts. Based on the life of Henri Matisse, this moving and inspirational picture book biography includes a note from the author, dynamic quotes from Matisse himself, and an illuminating look at a little-known part of a great artist's creative process.

A perfect facsimile of Jazz, a 20th century masterpiece This two-volume edition includes a perfect facsimile of Matisse's seminal cut-out work: Jazz. At last, readers can experience Jazz as if holding the 1947 original. The reputation of Henri Matisse (1869-1954) as the most important artist of the modern era is rivaled only by Picasso who himself said, "All things considered, there is only Matisse." Towards the end of his monumental career as a painter, sculptor, and lithographer, an elderly, sickly Matisse was unable to stand and use a paintbrush. So at almost 80 years of age, he developed a new technique: he drew shapes on colored paper, cut them out and pasted them together. These gouaches decoupees (gouache cut-outs) represented a revolution in modern art, yet their simplicity was dismissed by many critics as the folly of a senile old man. Later critics realized that Matisse had found a brilliant solution to the age-old conflict between line and color one that would profoundly influence generations of artists to come. Printed in exactly the same colors, using paper and inks similar to the 1947 edition, the facsimile volume allows readers to experience Jazz in its original, unbound form. \* Printed in 18 colors on a small offset press, 4 pages at a time, to obtain the highest fidelity to the original \* Printed on Old Mill in 190 g/m<sup>2</sup> from Italian paper mill Fedrigoni. This paper is of archival quality and has a felt-like softness, much like handmade paper \* As with the original, this reprint is unbound and folded in signatures of 4 pages. It is protected by a French folded jacket and a hard-backed cover The second volume provides a thorough historical context to Matisse's cut-outs, tracing their genesis in his 1930 trip to Tahiti, through to his final years in Nice. Also included are other pivotal works from his later career, including his contributions to Verve magazine and his exquisite decoration of the Vence Chapel. Includes rare and historic photographs by Matisse taken in Tahiti, as well as photos of Matisse by Henri Cartier-Bresson, Brassai, and the filmmaker Murnau. The text is supplemented by quotations from Matisse, Picasso, E. T riade (the publisher of Jazz and Verve), the poets Louis Aragon, Henri Michaux, and Pierre Reverdy, and Matisse's son-in-law, Georges Duthuit.

Henri Matisse is one of the leading figures of modern art. His unparalleled cut-outs are among the most significant of any artist's late works. When ill health first prevented Matisse from painting, he began to cut into painted paper with scissors as his primary technique to make maquettes for a number of commissions, from books and stained glass window designs to tapestries and ceramics. Taking the form of a 'studio diary', the catalogue re-examines the cut-outs in terms of the methods and materials that Matisse used, and looks at the tensions in the works between finish and process; and drawings and colour.

Focusing on one of Matisse's greatest bodies of work and his last artistic creations, this flexi edition of essays and reproductions provides scholarship on this important period.

Biography of French artist Henri Matisse discussing both his life and paintings.

The reputation of Henri Matisse (1869-1954) as the most important artist of the modern era is rivaled only by Picasso -- who himself said, "All things considered, there is only Matisse." Towards the end of his monumental career as a painter, sculptor, and lithographer, an elderly, sickly Matisse was unable to stand and use a paintbrush for a longer period of time. In this late phase of his life -- he was almost 80 years of age -- he developed the technique of creating brightly colored paper cut-outs. These gouaches decoupees (gouache cut-outs) represented a revolution in modern art, yet their simplicity was dismissed by many critics as the folly of a senile old man. Later critics realized that Matisse had found a brilliant solution to the age-old conflict between line and color -- one that would profoundly influence generations of artists to come.
