The stories of women, famous, infamous and unknown, who shaped the course of medieval history.

Unlike monks and nuns, clergy have hitherto been sidelined in accounts of the Middle Ages, but they played an important role in medieval society. This first broad-ranging study in English of the secular clergy examines how ordination provided a framework for clerical life cycles and outlines the influence exerted on secular clergy by monastic ideals before tracing typical career paths for clerics. Concentrating on northern France, England and Germany in the period c.800–c.1200, Julia Barrow explores how entry into the clergy usually occurred in childhood, with parents making decisions for their sons, although other relatives, chiefly clerical uncles, were also influential. By comparing two main types of family structure, Barrow supplies an explanation of why Gregorian reformers faced little serious opposition in demanding an end to clerical marriage in the eleventh and twelfth centuries. Changes in educational provision c.1100 also help to explain growing social and geographical mobility among clerics.

History Alive! The Ancient World introduces students to the beginnings of the human story. As they explore the great early civilizations of Egypt and the Near East, India, China, Greece, and Rome, students discover the secrets of these ancient cultures that continue to influence the modern world. History Alive! The Medieval World and Beyond explores the legacy of civilizations from Europe, Africa, and the Middle East to Asia and the Americas. History Alive! The United States Through Industrialism immerses students in a powerful journey through the history of the United States from its earliest foundations to the age of industrialism. History Alive! The United States Through Modern Times captures the story of the United States from the precolonial era to the 21st century.

Bring Science Alive! is an Integrated program built from the ground up to align to the Next Generation Science Standards (NGSS). Bring Science Alive! embodies the new vision for how science should be taught in schools-focusing on big picture concepts and teaching students how to "do science"--rather than memorize facts.
