The concept of culture lies at the heart of human geography. Locational decisions, patterns, and landscapes are fundamentally influenced by cultural attitudes and practices. The concept of culture, like the regional concept discussed in the previous chapter, appears to be deceptively simple, but in fact is complex and challenging.

Human geographers attempting to engage in cultural relativism, then, may struggle to reconcile aspects of their own culture with aspects of a culture that they are studying. Sometimes when people attempt to rectify feelings of ethnocentrism and develop cultural relativism, they swing too far to the other end of the spectrum.

In broad terms, cultural geography examines the cultural values, practices, discursive and material expressions and artefacts of people, the cultural diversity and plurality of society, and how cultures are distributed over space, how places and identities are produced, how people make sense of places and build senses of place, and how people produce and communicate knowledge and meaning.

Cultural geography - Human Geography - Research Guides at ...

Human geography or anthropogeography is the branch of geography that deals with humans and their communities, cultures, economies, and interactions with the environment by studying their relations with and across locations. It analyzes patterns of human social interaction, their interactions with the environment, and their spatial interdependencies by application of qualitative and quantitative research methods.

Human geography - Wikipedia

During the twentieth century, geography was marked by four durable traditions: earth-science (physical geography); cultural-environmental (encompasses a wide range of topics with a difficult, even controversial history); locational theory (the spatial focus of the discipline), which has become a modern element of human geography; and area-analysis (primarily involving the description of areas and regions), giving rise to what is today called regional science.

The new fifth edition of Harm de Blij's Human Geography covers the major elements of the human "half" of geography. The book addresses the two binding themes of geography: the spatial perspective and the relationships between human societies and natural environments.

This introduction to human geography focuses on culture, society, and human activity from a geographic perspective. Among the most distinctive features of the text is its well-integrated coverage of gender roles in society and culture.

Human geographers have been at the forefront of research that examines the relationships between space, culture and society. This volume contains twenty-one essays, published over the past thirty years, that are iconic instances of this investigative field. With a focus on four broad themes - landscape, identity, colonialism, nature - these essays represent some of the best and most innovative
