The information on the heater is Hydro Flame Corp. Terra Lab Engineers D Model. I couldn't get back to the info page to fill it in correctly (hit return too quick), but the RV is a 1985 Dolphin. I turned the burners on to bleed the line, and the flame is just blue, no orange, etc.to be seen.

These Best RV Tips come from fellow RVers, weekenders to life-timers, who have "been there, done that." and happily share their experiences so you don't have to learn the hard way. No matter if you use your RV just a few weekends and holidays a year or make it your full time home, you will find tips that will make your RV travels easier, safer and more enjoyable. You'll find tips that will save you time and money. You will find tips on getting your mail while traveling, internet access, boondocking, and work camping. You'll learn how to save money on camping fees just by choosing where to stay and staying longer. You will get tips on how you can customize your RV to make your home. Chapter Titles RV Care & Maintenance Tips RV Boondocking – Dry-Camping – Overnighting Tips RV Camping Tips/li> RV Park Reservation & Check-In Checklists RV Travel & Destination Tips RV Driving Tips RV Lifestyle Tips Work Camping Tips RV Accessories Tips RV Battery Tips RV Holding Tanks & Toilet Tips RV Fresh Water System Tips RV Electrical System Tips RV Refrigerator Tips Miscellaneous RV Tips Tips for RVing With Pets This book and includes over 400 tips. You pay pennies for tips that can save you hundreds of dollars. About the Editors: As most folks do, we started out tent camping. In the late 1970s we ventured across the country from northern California to western Pennsylvania and back through Washington and Oregon in Steven's boxy old 1965 Chevy van. Those were the days, my friends. That trip had a lasting effect and over time we realized we were destined to be full time RVers. In 1995 we sold our house and a Recreational Vehicle became our home. An RV has been our home every since.

This volume is a tribute to Professor Otto Hutzinger, the founding editor of The Handbook of Environmental Chemistry, in recognition of his pioneering work and contribution to our understanding of the sources, fate, exposure and effects of persistent organic pollutants. It consists of fourteen chapters written by individuals who have been inspired by his work and have followed in his footsteps by refining our knowledge of this field and opening new research directions. In Professor Hutzinger ’ s tradition of passing on valuable information to others, the authors present recent advances in areas such as inventories, remediation, and analytical determinations. Levels and trends in abiotic environments, biota, and human exposure via food, as well as the risks to the environment and humans from polychlorinated dibenzo dioxins, furans, and PCBs are also discussed. Other chapters deal with the relevant topics of DDT and its metabolites along with halogenated and phosphorus flame retardants.

Includes list of members, 1882-1902 and proceedings of the annual meetings and various supplements.

This publication explains in detail how a wood-frame house is put together in Canada, using the most commonly employed construction methods and providing suggestions for the selection of suitable materials. The practices described meet or exceed the minimum requirements set out in the National Building Code for 1985. The guide covers location and excavation; details of exterior and interior construction; insulation measures; fire and sound control measures; ventilation; protection against decay and termites; and exterior details such as flashing, eavestroughing and chimneys. A glossary is included.

This book addresses recycling technologies for many of the valuable and scarce materials from spent lithium-ion batteries. A successful transition to electric mobility will result in large volumes of these. The book discusses engineering issues in the entire process chain from disassembly over mechanical conditioning to chemical treatment. A framework for environmental and economic evaluation is presented and recommendations for researchers as well as for potential operators are derived.
