"The Idaho Reading Indicator (IRI) is a universal screen used to quickly assess the reading fluency of all Idaho public school students in grades kindergarten through third. The IRI is a tool that aids in the early identification of children with potential reading difficulties. Within the group of children with reading difficulties, some students have specific learning disabilities (SLD). Early identification of reading difficulties is critical to the success of all students who struggle with reading, especially students with SLD. To understand the problem, it is important to understand the nature of reading and the consequences of reading success and failure. The identification of SLD is not an easy task and differences in diagnostic approaches exist. The diagnostic value of the fluency assessment techniques employed by the IRI is examined."--Boise State University ScholarWorks.

This guide for testing coordinators includes information regarding: (1) Idaho statewide testing (both state and federal requirements); (2) testing dates; (3) Idaho Reading indicator (IRI); (4) Direct Mathematics Assessment (DMA); (5) Direct Writing Assessment (DEA); (6) Idaho Alternative Assessment (IAA); (7) Idaho Standards Achievement Test (ISAT); (8) Idaho English Language Assessment (IELA); and (9) National Assessment of Education Progress (NAEP). The following information is appended: (1) Accommodations Policy for Inclusion of LEP Students in Statewide Assessments; (2) Accommodations Policy for Inclusion of Special Education Students in Statewide Assessments; (3) Staff Preparation for Testing; (4) Press Release Blueprint; (5) Release of Test Scores; (6) Non-Public School Materials Request Form; and (7) DWA/DMA Reader-Scorer Nomination Form.

Examine critical studies on high-performing, high-poverty schools to identify how schools can fulfill the mission of educating all students to proficiency, especially students at risk. The authors compiled the most important research on how low-performing, high-poverty schools achieved radical improvements in learning for their most vulnerable students and also identified eight best practices, breaking them down into specific strategies, often using real-life examples from successful schools.

Kaplan now offers an indispensable tool for parents who want to help their elementary-school child perform well on standardized tests.

Establishing the parameters and goals of the new field of mind, brain, and education science. A groundbreaking work, Mind, Brain, and Education Science explains the new transdisciplinary academic field that has grown out of the intersection of neuroscience, education, and psychology. The trend in "brain-based teaching" has been growing for the past twenty years and has exploded in the past five to become the most authoritative pedagogy for best learning results. Aimed at teachers, teacher trainers and policy makers, and anyone interested in the future of education in America and beyond, Mind, Brain, and Education Science responds to the clamor for help in identifying what information could and should apply in classrooms with confidence, and what information is simply commercial hype. Combining an exhaustive review of the literature, as well as interviews with over twenty thought leaders in the field from six different countries, this book describes the birth and future of this new and groundbreaking discipline. Mind, Brain, and Education Science looks at the foundations, standards, and history of the field, outlining the ways that new information should be judged. Well-established information is elegantly separated from "neuromyths" to help teachers split the wheat from the chaff in classroom planning, instruction and teaching methodology.

A Road Map to Education: The CRE-ACT Way takes an approach to education with an arts based curriculum. This involves not only visual art and music but also dance and drama. Creative drama is used in the classroom as an experiential learning element.

Leveled passages and assessment pages to quickly screen for reading problems.
