Supporting Tools and Components for
Implementing Change Management Processes
Effective change management processes rely on
supporting activities and tools. These tools
are often developed and managed internally by
either the change management team or
stakeholders of the change management
process.

Information Technology plays a major role in

our society. Due to system integration and process automation, a company has to rely on performant information systems. To achieve this objective, it is important to have relevant IT processes in place on the one hand to ensure current operation and on the other hand to enable the successful introduction of new technologies. Once IT processes are defined and described, interrelations become visible, which allow to gain an appropriate level of maturity.

One of the key success factors for any organization is effective strategic change - to ensure adaptability and increase productivity. Despite its importance, most change management projects fail or only partly deliver on their promise, the missing link often being the conflict between boardroom strategic initiatives and the working process design of the company. Implementing Strategic Change shows that most of this conflict occurs during interfacing

activities – the seemingly small activities such as chasing, following up and seeking permission to proceed that help drive a process forward can make up to 80% of many employees workload. This book will show that business strategy and change implementation rely on deep and close process knowledge and help develop the framework for understanding and improving these activities in any organization.
