INNOVATIONS is a new five-level general English course for classes looking for new material with a fresh approach. Based on a language-rich, lexical/grammatical syllabus, it starts from the kinds of natural conversations that learners want to have. Online Teacher Training available!

This book presents a systematic literature review of 156 published papers on business model innovation (BMI). The aim is to identify and integrate the different theoretical perspectives, analytical levels, and empirical contexts in order to deepen understanding of this complex phenomenon. The authors conduct an inductive thematic analysis based on an informal ontological classification that identifies 56 key themes. Within each theme, discussion focuses on thematic patterns, potential inconsistencies and debates, and future directions and opportunities for research. The book makes a number of significant contributions to the field. First, it offers a deeper understanding of the evolution of research on BMI through an ontological map that identifies the key thematic areas in the literature. Second, a multilevel model is developed that clarifies the concept of BMI by identifying its drivers, contingencies, and outcomes. Third, the authors identify clear and specific directions for further research and offer suggestions on research design, creating an informative road map for the future. The book will be of value both to scholars and researchers and to practitioners.

Outlines an inspirational, four-step roadmap for reinventing oneself during times of personal or professional crisis, counseling readers in such areas as innovation, creating value, revising old approaches and understanding long-term processes. TV tie-in.

This book provides an overview of the theory, practice and context of entrepreneurship and innovation at both the industry and firm level. It provides a foundation of ideas and understandings designed to shape the reader's thinking and behaviour to better appreciate the role of innovation and entrepreneurship in modern economies, and to recognise their own abilities in this regard. The book is aimed at students studying advanced levels of entrepreneurship, innovation and related fields as well as practitioners (for example, managers, business owners). As entrepreneurship and innovation are largely indivisible elements and cannot be adequately understood if studied separately, the book provides the reader with an overview of these elements and how they combine to create new value in the market. This edition is updated with recent international research, including research and examples from Europe, the US, and the Asia-Pacific region.

Innovations is a new five-level general English course for classes looking for new material with a fresh approach. Based on a language-rich, lexical/grammatical syllabus, it starts from the kinds of natural conversations that learners want to have.

An updated and revised edition of the Objective CAE course, which prepares students for Cambridge English: Advanced, also known as Certificate in Advanced English (CAE). The Workbook provides the extra practice and consolidation of language and skills required at this level. The Audio CD provides extra listening practice.
