Thierry Meynard examines how the Jesuits in China came to understand the Confucian tradition, and how they offered the first complete translation of the Lunyu in the West, in the Confucius Sinarum Philosophus (Confucius, the Philosopher of China, 1687).

This book focuses on the ways in which military installations and small cities can implement and integrate triple net planning and

energy, water, and waste sustainability strategies into broad installation operational management, arrive at the best decision, create policy and communicate effectively to stakeholders. It explores current and emerging technologies, methods, and frameworks for energy conservation, efficiency, and renewable energy within the context of triple net zero implementation practice. Recognizing that the challenge extends beyond finding technological solutions to achieve triple net zero outcomes, the contributions also address the need for a systemic view in the planning phase, as well as adequate communication and policy measures and incentives.

An exploration of the way in which early Christians engaged with the Roman intellectual elite and its highly sophisticated Graeco-Roman tradition. Roger Green examines the works of Juvenius, Sedulius, and Arator, and shows how they repackaged the New Testament as epic, to try to make a bridge between two very different cultures.
