Internet radio services are usually accessible from anywhere in the world with a suitable internet connection available; one could, for example, listen to an Australian station from Europe and America. This has made internet radio particularly suited to and popular among expatriate listeners. Nevertheless, some major networks like Tuneln Radio, Entercom, Pandora Radio, iHeartRadio and Citadel Broadcasting (except for news/talk and sports stations) in the United States, and Chrysalis in the United Kingdom, restrict listening to in-country due to music licensing and advertising issues. Internet radio is also suited to listeners with special interests, allowing users to pick from a multitude of different stations and genres less commonly represented on traditional radio.Internet radio (also web radio, net radio, streaming radio, e-radio, IP radio, online radio) is a digital audio service transmitted via the Internet. Broadcasting on the Internet is usually referred to as webcasting since it is not transmitted broadly through wireless means. It can either be used as a stand-alone device running through the internet, or as software running through a single computer. Internet radio is generally used to communicate and easily spread messages through the form of talk. It is distributed through a wireless communication network connected to a switch packet network (the internet) via a disclosed source. Internet radio involves streaming media, presenting listeners with a continuous stream of audio that typically cannot be paused or replayed, much like traditional broadcast media; in this respect, it is distinct from on-demand file serving. Internet radio is also distinct from podcasting, which involves downloading rather than streaming.Internet radio services offer news, sports, talk, and various genres of music-every format that is available on traditional broadcast radio stations. Many Internet radio services are associated with a corresponding traditional (terrestrial) radio station or radio network, although low start-up and ongoing costs have allowed a substantial proliferation of independent Internet-only radio stations. The first Internet radio service was launched in 1993. As of 2017, the most popular internet radio platforms and applications in the world include (but are not limited to) Tuneln Radio, iHeartRadio, and Sirius XM.

There are now over 50,000 internet radio stations of all types and sizes. This book provides advice on setting up and running an online broadcasting service. Using minimal technical jargon, the book gives prospective broadcasters step-by-step guidance to getting on air with a low budget.

Beyond Powerful Radio is a complete guide to becoming a powerful broadcast communicator on radio or internet! This how-to cookbook is for broadcasters who want to learn the craft and improve. This practical and easy-to-read book, filled with bullet lists, offers techniques to learn everything from how to produce and host a show, to news gathering, coverage of investigative and breaking stories, writing and delivering the commercial copy and selling the air time. With contributions from over 100 top experts across all broadcast fields, Beyond Powerful Radio offers techniques, advice and lessons to build original programming, for news, programming, talk shows, producers, citizen journalism, copy writing, sales, commercials, promotions, production, research, fundraising, and more. Plus: Tips to assemble a winning team; to develop, build, and market your brand; get your next job in broadcasting, effectively promote your product; increase sales; write and produce commercials; raise money with your station; deal with creative burnout and manage high ego talent; and to research and grow your audience. Never be boring! Get, keep, and grow audiences through powerful personality, storytelling, and focus across any format. Tried-and-true broadcast techniques apply to the myriad forms of audio broadcast available today, including Web radio and podcasting. While the technology and delivery systems change, the one constant is content! Listeners, viewers, and surfers want to be entertained, informed, inspired, persuaded, and connected with powerful personalities, and storytellers. A full Instructor Manual is available with complete lesson plans for broadcast instructors - course includes Audio Production/Radio Programming/Management/Broadcast Journalism. The Instructor Manual is available for download here: <http://cw.routledge.com/textbooks/9780240522241/>

How Do I Promote My Music On A Small Budget? How Do I Get My YouTube Videos to Spread? How Do I Turn Casual Fans Into One ' s Who Buy From Me? How Do I Get Written About On Blogs? How Do I Increase Turnout At Shows? How Do I Make Fans Using Facebook, Twitter, Tumblr And SoundCloud? With every day that passes, the power the major labels once had dies a little more. The chance to get the same exposure as your favorite musicians gets easier and easier. The hurdles that would only allow you to get popular, if the right people said your music was good enough, are gone. You can now get exposed to thousands of potential fans without investing 1% of what musicians used to by building a fanbase based on listeners love for your music. No more writing letters hoping that A&R writes you back. This book explains how you do it. While many books will tell you obvious information, legal mumbo-jumbo and marketing catchphrases that don ' t help you get more fans. Our experience working with real bands - from upstarts like Man Overboard and Transit to legends like The Cure, The Misfits and Animal Collective, has led us to understand the insider tricks and ideas that go into some of the most important groups of our time. We produce records, do licensing deals, negotiate record contracts and get the musicians we work with written about on websites like Pitchfork and Vice. We have worked with bands who started off as nothing and became something. Unlike any other book written on the subject we have compiled the knowledge no one else has been willing to print in fear of obsoleting their own career. We give you thousands of ideas on how to get people to hear your music and turn them into fans who pay to support your music. Whether you are a label owner, musician, manager, booking agent or publicist there is information in this book that will help you do what you do better. Enjoy! For more information see GetMoreFansBook.com

This book was the first internet guide specifically written for musicians. Now fully revised and updated, the second edition is loaded with even more practical information on how to take full advantage of all the information age has to offer. Topics covered include: equipment requirements; getting online; e-mail; chat, IRC and instant messaging; MP3s and compressed audio; how to build your first website; internet radio and streaming audio; file sharing; selling music online; building web traffic; and more. A musician and software executive, Todd Souvignier is co-founder and CTO of Exploit Systems, Inc. His writing has appeared in Mix and Electronic Musician magazines. Gary Hustwit is the author of Releasing an Independent Record and Getting Radio Airplay. He has written for Billboard and Guitar World.

A detailed overview of the new features of Microsoft's Windows XP Media Center Edition PCs furnishes information on installation and set up, how to integrate the PC with a home network or entertainment center, and how to use such features as the system's Remote Control Interface, My TV, My Music, My Pictures, My Videos, and Play DVD. Original. (Beginner)

So, you think you have what it takes to be a DJ and broadcaster? Awesome news for you! And guess what? This is very lucky news for you because in today's technology, it allows anyone who wants to do what was once a limited to a very small percentage of people. But, now you can become an online / internet DJ and / or broadcaster! You can actually be the DJ, the station manager and even the program director who decides what to play on the station, because it's all on the internet! There are several ways and approaches you can take in creating a streaming Internet radio station. Which one you decide to choose depends on what your goals are and what type of ways you wish to go about doing them in. If you are really motivated and inspired to start an Internet-based radio station that operates for the sole purpose of profit and revenue generation, your direction and approach will be different than from the individual who just wants to set up an Internet radio station for the only purpose of simply sharing his or her favorite opinions, information or music with friends or people with the same interests as their own. There are many excellent options for the beginner that of which require very little technical knowledge. If you know how to create or put together MP3 format files, upload them onto a server and then choose some options, you can reach a world-wide audience! If this really interests you, keep on reading because you're about to enter the world of online radio.

The official "Ubuntu 10.10 Desktop Guide" contains information on how to using Ubuntu in a desktop environment.
