You can measure the conduction angle with an oscilloscope
but you will need some very specialized very low
capacitance and HV probes, with one channel sampling the
input voltage (at the tuned input or swamping resistor) and
another channel sampling the grid voltage at the grid. The
input circuit should show a complete sine wave whereas the
grid should show a a partial sine ellipse.

As her life turns topsy-turvy, however, she begins to think this might be exactly what she needs. Here, God might give her a glimpse into His will for her life. with married author Milo Rycroft leads to tragic consequences. Tessa returns to Florence, and, missing her sister desperately, Freddie, too, travels to Italy, where she is swept up in adventure, danger and romance, and makes a chance encounter that will change her life. With the outbreak of World War Two, Tessa and Freddie must fight for their own survival and happiness, while they wonder whether they will ever see each other again... What readers are saying about Catching the Tide: 'Ideal escapism' 'This beautifully written book has an overarching theme of love and loss, and expertly captures the hedonistic atmosphere of pre-war WW2 London and Europe' 'Wonderful story, I couldn't put the book down!'

Sam is a supervisor with a knack for solving problems; Jane is a binge alcoholic raising her prodigious daughter Clare on her own; and Calvin is a rebel out to fight the system. These strangers are ripped from the streets of their city and awake in the middle of a feud between the murderous military and a band of anti-government guerillas. After two days, the new friends are taken back home...almost...to find that nearly four years have passed. They soon determine the truth, that an incident far in the future has created a pendulum, one that crisscrosses time and space and draws ever nearer to the disaster that created it. Can four people stop the disaster before it kills tens of millions?

Prayer for the Day brings together 365 selected readings from the much loved, long-running series on BBC Radio 4. religions and denominations, with contemporary issues and themes that are often relevant to the date on which the programme is broadcast. In keeping with the theme of 'Prayer for the Day', there are 365 reflections in the book, from a vast range of the eminent religious figures and broadcasters who have contributed to the programme over the years. There is a foreword by a prominent figure in the faith community, a short profile of each contributor and an index of contributors. To emphasise the point that the reflections can be used daily, they are ordered by date (i.e. 1st January, 2nd January etc), and each entry is selected on the basis of it being as date-specific as possible. The date of broadcast is underneath each entry, and dates are also marked at the top corners of each page so they can be

Prayer for the Day is a beautiful and inspirational addition to any bedside table, with religious meditations that both participate in the ecumenical spirit of the 21st century and equip you perfectly for each day ' s journey.

What would it be like for a kid to tour our solar system? In this clever trip through the solar system, a diverse group of girls and boys explore every planet with their robot guide, Dr. Quasar. Facts about our galaxy, solar system, the sun, and each planet are revealed as the kids visit Mercury, Venus, Earth and its moon, through the asteroid belt, on to the planets in the outer reaches of the solar system, and

finally to the dwarf planet Pluto. Scientifically accurate, full-color illustrations show young readers the difference between planets, comets, asteroids, and other parts of the universe. As the kids write funny postcards home, they share more facts about each planet in an appealing kid-friendly way that helps introduce space and the unique aspects of our solar system. A short list of "space words" at the back of the book reminds readers about important concepts and vocabulary. Great for classroom use to introduce the solar system and space as well as for young explorers interested in space and science.
