Severe economic depression and the difficulty to acquire employment with adequate income have significant impact on a nation's social welfare. The need to provide ample educational opportunities is more imperative than ever, particularly in emerging economies. Technical Education and Vocational Training in Developing Nations is a comprehensive reference source for the latest literature on optimizing the implementation of curriculum development and instructional design strategies for technical and vocational education. Featuring innovative coverage across a range of relevant topics, such as curriculum deficiency, teacher competencies, and accessible learning, this book is ideally designed for policy makers, academicians, researchers, advanced-level students, technology developers, and educators interested in the improvement of professional learning programs.

"Various political dispensations have always claimed entitlement over India and her people on the back of electoral mandate over the past several decades since India attained Independence. However India has been denied its rightful place in the comity of Nations when measured on the critical index of human, economic & social development. This book is a vivid account of the progress made by India under the watch of various political parties & questions the glaring loopholes in our development story which they have left behind for the future generations to fill."

SGN. The book UPPCL- Assistant Accountant is extremely useful for the exam.

This book introduces readers to the concept and theories of decent work and provides a framework for measuring it at the micro, meso and macro level in a given country. Further, it addresses the importance of measuring decent work in today's world and in connection with the different challenges countries face depending on their respective stage of development. The essence of the book lies in highlighting the practical applications of decent work in terms of its ability to deliver empirical measurements of qualitative and subjective phenomena with a mixed-methods approach combining tools and techniques from economics and statistics. Moreover, as the applicability of decent work is not confined to the IT industry and formal sectors of the economy, the book also provides useful guidelines on how further empirical studies can be undertaken to measure decent work in non-IT industries. As such, the book offers a rich compilation of empirical and theoretical contributions on decent work designed to not only enrich readers' understanding, but also promote awareness of the practical relevance and technical aspects of the subject matter.

This book focuses on the causes of starvation in general and famines in particular. The traditional analysis of famines is shown to be fundamentally defective, and the author develops an alternative analysis.

Empowering the New Mobility Workforce: Educating, Training, and Inspiring Future Transportation Professionals enlists a multidisciplinary roster of subject matter specialists who identify the priorities and strategies for cultivating a skilled workforce for the rapidly changing transportation landscape. Transportation employers will need to hire 4.6 million workers—1.2 times the current transportation workforce—in the next decade. The book explores how leaders in education, industry and government can work together to create an ecosystem that facilitates learning and upskilling for emerging and incumbent transportation workers. Readers will learn how to conduct labor market analyses and develop competency models to adapt their workforce. This book will empower readers to establish ongoing communities of practice that cultivate sustainable career pathways that respond to ever-evolving socioeconomic trends and transformational technologies. Provides a comprehensive assessment of the new technologies and consumer attitudes driving change in personal vehicle, mass transit, active transportation, and goods movement, both domestically and internationally Identifies the career pathways, experiential learning models, and types of curriculum needed to prepare emerging professionals to develop and operate transportation systems of the future Emphasizes, through case studies, innovative practices emerging in public- and private-sector transportation organizations Draws on key work conducted in the United States and around the world, acknowledging the increasing interconnectedness of transportation systems between countries, economies and social networks that transcend national boundaries
