A coverage of the Transputer Development System (TDS), an integrated programming environment which facilitates the programming of transputer networks in OCCAM. The book explains transputer architecture and the OCCAM programming model and incorporates a TDS user guide and reference manual.

Fuzzy logic is enjoying an unprecedented popularity – and for excellent reasons. It has moved successfully beyond the technological and engineering fields into areas as diverse as consumer and electronic products and systems, the stock market, and medical diagnostics.

Getting Started. Using UNIX Tools. Bourne Shell Programming. Creating Applications with UNIX Tools.

A New York Times Notable Book of the Year "Full of insights, marvelously entertaining . . . haunting and beautifully written." --The New York Review of Books "I lived in Athens, at the intersection of a prostitute and a saint." --So begins Patricia Storace's astonishing memoir of her year in Greece. Mixing affection with detachment, rapture with clarity, this American poet perfectly evokes a country delicately balanced between East and West. Whether she is interpreting Hellenic dream books, pop songs, and soap operas, describing breathtakingly beautiful beaches and archaic villages, or braving the crush at a saint's tomb, Storace, winner of the Whiting Award, rewards the reader with informed and sensual insights into Greece's soul. She sees how the country's pride in its past coexists with profound doubts about its place in the modern world. She discovers a world in which past and present engage in a passionate dialogue. Stylish, funny, and erudite, Dinner with Persephone is travel writing elevated to a fine art--and the best book of its kind since Henry Miller's The Colossus of Maroussi. "Splendid. Storace's account of a year in Greece combines past and present, legend and fact, in an unusual and delightful whole. " --Atlantic Monthly

In this stimulating collection of essays, John Roberts draws together a wide range of work on some of the most important artists of the post-war period. Written by leading art historians and artist-writers, the essays take a sharply critical look at the construction of modern art history. The artists discussed include Francis Picabia, Robert Smithson, Ad Reinhardt, Andy Warhol, Gerhard Richter, Mary Kelly, Cindy Sherman, Victor Burgin and Laurie Anderson. The extensive influence of post-structuralism on all schools of art history has brought about a widespread derogation of questions around intentionality and social agency. Free-ranging textual interpretation has come to outweigh causal analysis. Art Has No History! reverses this bias. Putting the artist back into art history, the essays reinstate the claims for historical materialism as a theory of the conflictual socialization of individuals. Acknowledging the dissemblances involved in the representations of artistic invention, the book challenges the self-image of traditional art history and the radical New Art History alike. In his introduction, John Roberts gives a fascinating account of the vicissitudes of Marxist writing on art, from Max Raphael and Arnold Hauser to T.J. Clark and Griselda Pollock. Placing the debates on intention and agency in their wider political context, he refers to what he calls "the continuing influence of historical materialism on the best Anglophone art writing today." Art Has No History! is a lively and iconoclastic contribution to that tradition.
