of the lungs is the single most important and most effective step in cardiopulmonary resuscitation of the compromised newborn.

~~Newborn Resuscitation: The Science of NRP 7th Edition~~

Revisions include:

- Begin the resuscitation with antenatal counseling (when appropriate) and a team briefing and equipment check.
- Maintain the newborn's normal body temperature during resuscitation.
- Consider using a cardiac monitor when PPV begins.
- Ensure ventilation that inflates and moves the chest.
