Intelligent Business is a range of Business English materials that includes components specifically designed to meet the need of students who either need to learn business through English or perform familiar business tasks in English.

This book describes the process of language test construction and reviews current practice.

Now going into its 9th edition, the successful textbook Book-keeping and Accounts is a vital guide for students undertaking studies of book-keeping and accounting for the first time. Through its gradual introduction of topics, explanation of technical terminology in a clear, easy to understand way, this text provides an accessible and reliable guide for any student in their undergraduate career. New to this edition: - Fully compliant with International Financial Reporting Standards (IFRS), with current IFRS terminology. - Questions and exercises to test your understanding and help with revision. - Selected chapters amended and re-structured. - Full explanation of HMRC changes in VAT relating to cash discounts. - Illustrations and diagrams to help explain key concepts. - Updated ' learning objectives ' and ' chapter summaries ', to reflect developments in the financial environment. - Easy to understand to double entry book-keeping using the ' IN ' and ' OUT ' approach. With its highly regarded authorship this text is used by lecturers for teaching students undertaking the following qualifications and examinations; Association of Accounting Technicians (AAT), International Association of Book-keepers (IAB), A Level Accounting, Oxford Cambridge and Royal Society of Arts (OCR), and as a general foundation text for personnel employed in the accountancy profession. Accompanying the text is a collection of resources to support both lecturers and students which can be found at www.pearsoned.co.uk/wood - For instructors : Solution 's manual, and Powerpoint slides - For students : Opportunities to practise and additional support with our companion website

This book is suitable for those preparing for the examinations of ICB, AAT, IAB, OCR, AQA and all other courses in computerised accounting. Learning computerised book-keeping skills is very different from manual accounting. It can seem more like learning computer studies than book-keeping, and it is often difficult to connect it with what may have been previously learned in manual book-keeping. In this book Dr Marshall resolves this problem with the same skill and insight that made his book on manual book-keeping, Mastering Book-keeping, so useful to readers over the years. Deliberately constructing a clear and continuous bridge between the methods so that the student never loses sight of the double entry concept, he presents the material in a way that makes computerised book-keeping clear and easy to understand.

Double-entry accounting can be easy if it's explained well, and Mastering Book-keeping does just that. Now in its updated 8th edition, this popular book has helped thousands of people to get to grips with book-keeping. It explains the principles and practice of book-keeping sequentially, and includes: - The daybooks and ledger accounts - End of year accounting - Sole proprietorships, limited companies, partnerships and not-for-profit organisations - Using computers for accounting - Accounting for VAT - Progressing to more advanced management accounting - The implications of the Data Protection Act 1998 on book-keepers Plus step-by-step guides to compiling a balance sheet, depreciation, accounting for bad and doubtful debts, and much more. Everything is made clear with easy-to-follow explanations. Typical transactions are illustrated throughout to make the information even easier to understand. This book is suitable for those preparing for the examinations of ICB, AAT, IAB, OCR, AQA and all other courses in book-keeping and accounts.
