across 9 states and 180 elementary, middle, and secondary schools. In this book, Kenneth Leithwood, Karen Seashore Louis, and their colleagues report on what they found. They examined leadership at each organizational level in the school system—classroom, school, district, community, and state. Their comprehensive approach to investigating school leadership offers a balanced understanding of how the structures within which leaders operate shape what they do. The results within will have significant implications for future policy and practice. Praise for *Linking Leadership to Student Learning* "Kenneth Leithwood and Karen Seashore Louis offer a seminal new contribution to the leadership field. They provide a rich and authoritative evidence base that demonstrates clearly just why school leadership is so important and how it promotes successful student learning." —PAMELA SAMMONS, Ph.D., Professor of Education, Department of Education, University of Oxford, Oxford "This ambitious, groundbreaking, and thought provoking treatment of the link between school leadership and student learning is a testament to the outstanding work of these exemplary scholars. This is a 'must read' for academics and practitioners alike." —MARTHA MCCARTHY, President's Professor, Loyola Marymount University, and Chancellor's Professor Emeritus, Indiana University "The question is no longer whether school and district leader's impact student learning, but rather how they do it. What does it take to be a good school principal? No two principals work exactly the same way, but research shows that effective principals focus on a core set of factors critical to fostering success among all students. In this second edition of *Qualities of Effective Principals*, James H. Stronge and Xianxuan Xu delineate these factors and show principals how to successfully balance the needs and priorities of their schools while continuously developing and refining their leadership skills. Throughout the book, the authors provide practical tools and extensive research that will help principals

What kind of leadership makes learning possible for all students? How can school leaders help teachers increase their knowledge and improve their instructional abilities? What actions should leaders take to ensure that learning occurs? In *Connecting Leadership with Learning: A Framework for Reflection, Planning, and Action*, Michael A. Copland and Michael S. Knapp give educational leaders a new way to answer these questions and find solutions perfect for their particular school environment. Copland and Knapp assert that far too many educational leaders are struggling with outdated curricula, demands that don't align with their school or district goals, and professional meetings that are high on complaints but low on solutions. Instead of prescribing a linear or rigid approach, the authors encourage educators to be attentive and tune into their leadership actions by using the Leading for Learning Framework. The framework provides different vantage points to help leaders reflect on their strengths and weaknesses, plan for improvement, and take actions to foster learning for students, teachers and professionals, and school and district leaders. The Leading for Learning Framework will empower leaders to *Establish a focus on equitable learning *Build professional communities *Engage communities and external partnerships *Act strategically and share leadership *Create coherence in their leadership actions The book includes extended case studies, descriptions of 23 different leadership "pathways," and many examples from schools and districts that show the Leading for Learning Framework in action. There is no magic formula for great school leadership, but Copland and Knapp conclude that magic can happen when leaders reframe their efforts to focus more clearly on learning.

"A guidebook for school district administrators who are implementing a mobile device program"--

What makes a great school leader? Contrary to what many believe, the answer is not tied to a certain kind of personality but to specific behaviors and actions that have positive effects on student achievement—behaviors and actions that any school leader can learn and put into practice. Over the last decade, thousands of school principals have done that, by implementing “balanced leadership,” an approach that recognizes the need to both maintain and challenge the status quo in order to move schools forward. Building on the analysis that was first reported in *School Leadership That Works*, the authors

of Balanced Leadership identify the 21 responsibilities associated with effective leadership and show how they relate to three overarching responsibilities: * Establishing a clear focus—keeping the work and the conversations targeted on the issues that matter most; * Managing change—understanding how to skillfully steer through the challenges associated with making improvements, both large and small; and * Developing a purposeful community—creating a sense among all teachers and staff that they are invested in student outcomes and that they can make a difference. For each of these areas, key points and specific practices are described in detail and illustrated with stories from school principals who have successfully learned how to become great leaders. Step-by-step tools provide clear guidance for readers who are ready to make the same kind of journey—one with the potential to transform them and the schools they serve.
