This book is a 'back to the future' examination of traditional leisure as experienced by peoples from countries around the world. The stories and accounts narrated in the essays are a (re)discovery of core leisure values, and these remind us to focus on the essence of leisure while discerning the superficial and the meaningless. The idea that affluent societies formulated more meaningful leisure concepts and practices due to the greater availability of free time and resources has not come to fruition in recent decades. In fact, social-cultural changes in both Western and developing countries have created the need for a critical examination of leisure arising out of a concern that the values and benefits of leisure, as enshrined in earlier Western leisure theory, have been eroded, while those of traditional societies have not been given due credence. In this volume, contributors from developing societies address the issue of how traditional leisure forms are impacting modern practices and understanding of leisure, leading to new hybrid forms that are more inclusive even as they are expressive of the varied modes of leisure.

Alternative modes of leisure practice that go beyond the work-leisure binary, giving primacy to the leisure experiences undertaken in affluent societies, also form an important segment of the book. The essays on tourism make a critical evaluation of both the enhancing and the deleterious facets of this popular leisure form, as they examine how traditional ways of life are turned into sites for both a deeper understanding of different cultures and for the benefit of voyeurs. An interesting aspect of the book is an exploration of how certain pilgrimage sites have turned into tourist spaces for reconciliation and interaction between the erstwhile exploiter and the exploited. The essays detailing leisure practices from all continents of the world ably incorporate theoretical perspectives that underpin those practices.

This volume addresses the rich and varied thoughts, concepts, approaches and leisure practices in sixteen countries of three continents---Australia, Asia and Africa. The chapters showcase the diversity in the forms and ways in which the idea and practice of leisure have developed across space and time. However, the common thread through the chapters is that concepts and practices of leisure are found all over the world, from pre-historic settlements to the present-day consumer societies. Seemingly, being at leisure is a capacity of the human species present at birth and which develops in a variety of individual and societal contexts. Even in situations where leisure gets little official recognition as being an aspect of life---such as under colonial rule or in extremely work-centric societies---it needs to be contextually understood. This is a welcome addition to the literature on leisure studies from a global and comparative perspective.

Women, Leisure and Tourism provides a comprehensive discussion of women, leisure, and tourism through the lens of leisure production and consumption, both by women and for women. Specifically, this text includes a multi-cultural perspective to highlight the unique attributes leisure brings to women, the role of women in leisure entrepreneurship, and the creation of supportive, inclusive environments to enhance female well-being through the examination of these activities in often overlooked populations. The diversity of women's leisure and tourism practices is best perceived through the links between various leisure practices (e.g., sport, outdoor recreation, travel and tourism, learning, crafts, events, family leisure), as well as an understanding of leisure production across cultures and life stages. These chapters bring to the forefront many of the challenges inherent in providing leisure and tourism that support the diverse needs of women, as well as a look at female innovation that is also often overlooked in leisure research. The book includes examples of both applied and conceptual chapters from global perspectives in academic studies.

This book provides insights into the lived experiences of researchers as they negotiate the undulating terrain of the world of paradigms and seek to find their niche. Each chapter presents the journeys of postgraduate candidates, early career researchers and established scholars, starting with an overview of their paradigm, the application of the paradigm to their specific research context, and concluding with the authors reflecting on their identification with and use of the paradigm. The volume acknowledges that determining the paradigm that best aligns with a scholar's personal ideologies and the underlying assumptions of the research can be rather daunting, challenging and perplexing to scholars who are starting their research journey. It offers an accessible exploration of research paradigms and will be a valuable resource for postgraduate researchers, emerging scholars and PhD supervisors.
