A fungus called Pestalotiopsis is occasionally associated with brown patches, and can be seen as tiny, black fruiting bodies scattered over the affected foliage. This fungus usually attacks weakened or damaged plants, but once present it can sometimes cause quite severe die-back. Pestalotiopsis is more likely to be a problem in wet summers.

#1 NEW YORK TIMES BESTSELLER • When we deny our stories, they define us. When we own our stories, we get to write the ending. Look for Brené Brown ' s new podcast, Dare to Lead, as well as her ongoing podcast Unlocking Us! Social scientist Brené Brown has ignited a global conversation on courage, vulnerability, shame, and worthiness. Her pioneering work uncovered a profound truth: Vulnerability—the willingness to show up and be seen with no guarantee of outcome—is the only path to more love, belonging, creativity, and joy. But living a brave life is not always easy: We are, inevitably, going to stumble and fall. It is the rise from falling that Brown takes as her subject in Rising Strong. As a grounded theory researcher, Brown has listened as a range of people—from leaders in Fortune 500 companies and the military to artists, couples in long-term relationships, teachers, and parents—shared their stories of being brave, falling, and getting back up. She asked herself, What do these people with strong and loving relationships, leaders nurturing creativity, artists pushing innovation, and clergy walking with people through faith and mystery have in common? The answer was clear: They recognize the power of emotion and they ' re not afraid to lean in to discomfort. Walking into our stories of hurt can feel dangerous. But the process of regaining our footing in the midst of struggle is where our courage is tested and our values are forged. Our stories of struggle can be big ones, like the loss of a job or the end of a relationship, or smaller ones, like a conflict with a friend or colleague. Regardless of magnitude or circumstance, the rising strong process is the same: We reckon with our emotions and get curious about what we ' re feeling; we rumble with our stories until we get to a place of truth; and we live this process, every day, until it becomes a practice and creates nothing short of a revolution in our lives. Rising strong after a fall is how we cultivate wholeheartedness. It ' s the process, Brown writes, that teaches us the most about who we are. ONE OF GREATER GOOD ' S FAVORITE BOOKS OF THE YEAR " [Brené Brown ' s] research and work have given us a new vocabulary, a way to talk with each other about the ideas and feelings and fears we ' ve all had but haven ' t quite known how to articulate. . . . Brené empowers us each to be a little more courageous. " —The Huffington Post

Three years after his arrival onboard, Tommy begins Specific Training to assume his place in his father's society. The transition to adulthood, laden with unexplored emotions and overwhelming responsibilities, have made this unstoppable change too much to handle. #1 NEW YORK TIMES BESTSELLER - A timely and important book that challenges everything we think we know about cultivating true belonging in our communities, organizations, and culture, from the #1 bestselling author of Rising Strong, Daring Greatly, and The Gifts of Imperfection Look for Brené Brown's new podcast, Dare to Lead, as well as her ongoing podcast Unlocking Us! REESE'S BOOK CLUB PICK "True belonging doesn't require us to change who we are. It requires us to be who we are." Social scientist Brené Brown, PhD, MSW, has sparked a global conversation about the experiences that bring meaning to our lives--experiences of courage, vulnerability, love, belonging, shame, and empathy. In Braving the Wilderness, Brown redefines what it means to truly belong in an age of increased polarization. With her trademark mix of research, storytelling, and honesty, Brown will again change the cultural conversation while mapping a clear path to true belonging. Brown argues that we're experiencing a spiritual crisis of disconnection, and introduces four practices that challenge everything we believe about ourselves and each other. She writes, "True belonging requires us to believe in and belong to ourselves so fully that we can find sacredness both in being a part of something and in standing alone when necessary. But in a culture that's rife with perfectionism and pleasing, and with the erosion of civility, it's easy to stay quiet, hide in our ideological bunkers, or fit in rather than show up as our true selves and brave the wilderness of uncertainty and criticism. But true belonging is not something we negotiate or accomplish with others; it's a daily practice that demands integrity and authenticity. It's a personal commitment that we carry in our hearts." Brown offers us the clarity and courage we need to find our way back to ourselves and to each other. And that path cuts right through the wilderness. Brown writes, "The wilderness is an untamed, unpredictable place of solitude and searching. It is a place as dangerous as it is breathtaking, a place as sought after as it is feared. But it turns out to be the place of true belonging, and it's the bravest and most sacred place you will ever stand."

Should we bring raincoats to the big game? Will the fog lift before we get to the coast? Should we let in the animals in case there is a tornado this afternoon? People love talking about the weather, but it is more than just conversation. Weather can change rapidly and produce suddenly hazardous conditions. Studying data from satellites, radar, and other technology helps us prepare and stay safe. Animals, on the other hand, also need to predict the weather. They rely on their senses to know what to expect so they can stay warm in a blizzard, remain cool in a heat wave, or find food in a fog bank. Hours before we wake up, weather anchor Guy Brownis at the TV studio reviewing atmospheric readings, humidly rates, and Doppler reports. He needs to tell his viewers how to plan for the days ahead. He also introduces some of the animals who forecast weather in environments around the world. With Mario Lugo's vivid art, readers see some of the amazing clouds that bring us wildly different weather and learn how animals use their adaptations to weather the storms. Guy acquaints readers with cloud identification techniques while sharing a glimpse into survival--in town and in the wild.
