Luc Ferry's A Brief History of Thought (2011) is a very pretty piece of humanism in which he notes that philosophy is a search for salvation. The author surveys five major eras, or "great moments," of thought: early Greek dominance, the Christian middle ages, the Enlightenment that birthed modern philosophy, postmodernity, and the present stage "after deconstruction."

Between The Times – Briefly Noted: On Luc Ferry and the ...

In A Brief History of Thought, Ferry seeks to satisfy two needs: that of an adult who wants to know what philosophy is about, but does not necessarily intend to proceed any further; and that of a young person who hopes eventually to further their study, but does not as yet have the necessary bearings to be able to read these challenging authors for herself or himself.

THE INTERNATIONAL BESTSELLER From the timeless wisdom of ancient Greece through to Christianity, the Enlightenment, existentialism and postmodernism, *A Brief History of Thought* brilliantly and accessibly explains the enduring teachings of philosophy - including its profound relevance in today's world as well as its essential role in achieving happiness and living a meaningful life. This lively journey through the great thinkers challenges every one of us to learn to think for ourselves and asks us the most important question of all: how can we live better?

From the ordered universe of the ancient Greeks to the shadows of Nietzsche's nineteenth century, *LEARNING TO LIVE* shakes the dust from the history of philosophy and takes us on a fascinating journey through more than two millennia of humanity's search for understanding - of the world around us and of each other. Both a sparkling and accessible history of Western thought, and a courageous dissection of how religion and philosophy have converged and clashed through the ages, Luc Ferry's blueprint for a new humanism challenges every one of us to learn to think for ourselves, and asks us the most important question of all: how can we live better?

Please note: This is a companion version & not the original book. Sample Book Insights: #1 The question What is philosophy. is one of the most controversial and debated in the field of philosophy. It is a simple but fundamental proposition that the human being is a finite being who is aware of his limits. He cannot prevent himself from thinking about this state of affairs, which is disturbing and absurd. #2 The word salvation is defined first and foremost as the condition of being saved, of escaping a great danger or misfortune. But from what great danger or misfortune do religions deliver us. They deliver us from the peril of death. #3 We must first and foremost conquer our fear of the irreversible. We must live well, free of fear, joy, and generosity. #4 Religions are doctrines of salvation, while philosophical doctrines are doctrines of salvation without the help of a God. The great philosophies are defined as doctrines of salvation because they claim to save us from death and the anxiety it causes by the exercise of our own resources and our innate faculty of reason.

success and self-absorption? Luc Ferry argues that modernity and the emergence of secular humanism in Europe since the eighteenth century have not killed the search for meaning and the sacred, or even the idea of God, but rather have transformed both through a dual process: the humanization of the divine and the divinization of the human. Ferry sees evidence for the first of these in the Catholic Church's attempts to counter the growing rejection of dogmatism and to translate the religious tradition into contemporary language. The second he traces to the birth of modern love and humanitarianism, both of which demand a concern for others and even self-sacrifice in defense of values that transcend life itself. Ferry concludes with a powerful statement in favor of what he calls "transcendental humanism"—a concept that for the first time in human history gives us access to a genuine spirituality rooted in human beings instead of the divine.

Can subjective, individual taste be reconciled with an objective, universal standard? In *Homo Aestheticus*, Luc Ferry argues that this central problem of aesthetic theory is fundamentally related to the political problem of democratic individualism. Ferry's treatise begins in the mid-1600s with the simultaneous invention of the notions of taste (the essence of art as subjective pleasure) and modern democracy (the idea of the State as a consensus among individuals). He explores the differences between subjectivity and individuality by examining aesthetic theory as developed first by Kant's predecessors and then by Kant, Hegel, Nietzsche, and proponents of the avant-garde. Ferry discerns two "moments" of the avant-garde aesthetic: the hyperindividualistic iconoclasm of creating something entirely new, and the hyperrealistic striving to achieve an extraordinary truth. The tension between these two, Ferry argues, preserves an essential element of the Enlightenment concern for reconciling the subjective and the objective—a problem that is at once aesthetic, ethical, and political. Rejecting postmodern proposals for either a radical break with or return to tradition, Ferry embraces a postmodernism that recasts Enlightenment notions of value as a new intersubjectivity. His original analysis of the growth and decline of the twentieth-century avant-garde movement sheds new light on the connections between aesthetics, ethics, and political theory.

The past fifteen years in France have seen a remarkable flourishing of new work in political philosophy. This anthology brings into English for the first time essays by some of the best young French political thinkers writing today, including Marcel Gauchet, Pierre Manent, Luc Ferry, and Alain Renaut. The central theme of these essays is liberal democracy: its nature, its development, its problems, its fundamental legitimacy. Although these themes are familiar to American and British readers, the French approach to them—which is profoundly historical and rooted in the tradition of continental philosophy—is quite different from our customary one. Included in this collection is a series of reconsiderations of French critics of liberal society (Lévi-Strauss, Foucault, Bourdieu) and of classical European liberals (Kant, Constant, Tocqueville). The continuing controversies over the nature of the modern era and the place of religion within it play a central role throughout the collection. The book includes a debate on the foundations of human rights and on the nature of a liberal political order. The concluding section presents some of the new sociological writing on modern individualism, its pleasures and its discontents. An introduction by Mark Lilla provides the historical background to the revival of French political thought about liberalism, and offers an analysis of what American and English readers might learn from it. conversation quite this wonderful.” — Boston Globe A fascinating journey through Greek mythology that explains the myths' timeless lessons and meaning. Heroes, gods, and mortals. The Greek myths are the founding narratives of Western civilization: to understand them is to know the origins of philosophy, literature, art, science, law, and more. Indeed, as Luc Ferry shows in this masterful book, they remain a great store of wisdom, as relevant to our lives today as ever before. No mere legends or clichés ("Herculean task," "Pandora's box," "Achilles heel," etc.), these classic stories offer profound and manifold lessons, providing the first sustained attempt to answer fundamental human questions concerning "the good life," the burden of mortality, and how to find one's place in the world. Vividly retelling the great tales of mythology and illuminating fresh new ways of understanding them, *The Wisdom of the Myths* will enlighten readers of all ages.
