The first book of its kind to offer a unique functions approach to managerial communication, Managerial Communication explores what the communication managers actually do in business across the planning, organizing, leading, and controlling functions. Focusing on theory and application that will help managers and future managers understand the practices of management communication, this book combines ideas from industry experts, popular culture, news events, and academic articles and books written by leading scholars. All of the levels of communication (intrapersonal, interpersonal, group, organizational, and intercultural) play a role in managerial communication and are discussed thoroughly. The top, middle, and frontline communications in which managers engage are also addressed. Expounding on theories of communication, the authors relate them to the theories of management—such as crisis management, impression management, equity theory, and effective presentation skills. These are the skills that are invaluable to management.

Already a tried-and-tested guide for trainee psychologists and psychotherapists, as well as clinicians in mental health services and private practices, this text is also of value to practitioners who need refresher courses in CBT.

The purpose behind Communicating Gender Diversity: A Critical Approach is not to provide any final conclusions about communicating gender. Because gender is a constantly evolving concept, both in terms of individuals’ gender identity development and the larger culture/Es predominant notions of gender, such absolute claims are not possible. Instead, the intent is to better equip readers with tools with which they can examine, and make sense of, the intersections of communication and gender. The text covers the variety of ways in which communication of and about gender and sex enables and constrains people’s intersectional identities. The authors believe people are social actors and, as such, create meaning through their symbolic interactions. Thus, the book’s emphasis is not on how gender influences communication, but on how communication constitutes gender. They also believe that people are capable of being self-reflective about communication processes, and creative in generating new ways to play with symbols.
