Praise for the previous edition: This work has great visual appeal and superb images...a superior text that will undoubtedly withstand the test of time.--Gastroenterology Written and edited by internationally renowned specialists, the second edition of Gastroenterological Endoscopy covers the entire spectrum of diagnostic and therapeutic procedures for the upper and lower GI tract and provides an up-to-date overview of GI disorders. The book opens with a section on the development and technology of endoscopy, followed by an expanded section on issues related to patient care, such as informed consent, sedation, and special clinical conditions. The discussion of techniques for the diagnosis of GI diseases ranges from enteroscopy and colonoscopy to recent advances in capsule endoscopy and chromoendoscopy. New to the section on therapeutic procedures is coverage of such topics as dilation techniques, resection, ablation, and dissection. The book closes with a chapter on pediatric endoscopy. Features of the second edition: Thirteen new chapters present current developments in the specialty, including evidence-based approaches, natural orifice transluminal endoscopic surgery (NOTES) and hybrid procedures, endoscopic therapy in obesity, and therapeutic endosonography. Insightful contributions are presented in a format that aids rapid reference to key topics. 1,820 high-quality illustrations and endoscopic images, including over 1,135 in full-color, demonstrate anatomy and

The introduction of ultrasound has radically altered the clinical approach to patients with digestive diseases as it is now possible to observe the abdominal organs rapidly and noninvasively. This publication thoroughly covers the main applications of ultrasound in gastroenterology, with particular reference to the most recent progress in the field. The articles, contributed by leading international experts, are organized into three sections. The first section of the book focuses on the applications of transabdominal and intraoperative ultrasound in the diagnosis of diseases of the liver and pancreas. A

further section deals with interventional ultrasound where the treatment of hepatocellular carcinoma by alcoholization or laser is one of the topics of interest. Recent applications of ultrasound are discussed in the final section: the study of the abdominal vessels with duplex and color Doppler receives extensive coverage and other contributions consider new developments in endoscopic ultrasound and contrast agents. Attention is also given to the use of ultrasound in patients with HIV and AIDS. Given ultrasound's importance today, this book is essential reading for radiologists, gastroenterologists, internists and surgeons.
