these properties can be exploited to produce high-performance materials and devices. Following chapters explore naturally occurring nanoparticles and artificially engineered carbon nanoparticles, their mechanical properties, and their applications in nanotechnological science. Both design ideologies for manufacturing nanostructures—bottom-up and top-down—are examined, as is the idea that the two methodologies can be combined to allow for the imaging, probing, and manipulation of nanostructures. A survey of the current state of nanotechnology rounds out the text and introduces the reader to a variety of novel and exciting applications of nanoscience. The book also includes: A thorough
