This contributed work covers, in precise detail, the potential sources of error in floating-point programming and how these trouble spots can be controlled. Explains several methods for improving the accuracy of floating-point programming, concentrating on those methods that are relevant to the exploitation of the Karlsruhe Accurate Arithmetic.

Special edition of the Federal Register, containing a codification of documents of general applicability and future effect ... with ancillaries.

The Code of Federal Regulations is the codification of the general and permanent rules published in the Federal Register by the executive departments and agencies of the Federal Government.

This is an introduction to programming using Microsoft's Visual Basic.NET 2010, intended for novice programmers with little or no programming experience or no experience with Visual Basic. The text emphasizes programming logic and good programming techniques with generous explanations of programming concepts written from a non-technical point of view. It stresses input, processing, and output and sequence, selection, and repetition in code development. File I/O and arrays are included. Later chapters introduce objects, event programming, and databases. By taking a slow and steady approach to programming ideas, this book builds new concepts from what the reader has already learned. VB tips and quips inject both humor and insight. The book includes numerous programming examples and exercises, case studies, tutorials, and 'fixing a program' sections for an in-depth look at programming problems and tools. Quizzes and review questions throughout each chapter get students to think about the materials and how to use them. Each chapter has a summary and glossary for extra review. The accompanying website, www.cambridge.org/us/McKeown, has code downloads, I/O, and database files from small, simple files to large files with thousands of records, flowcharts, deskchecks and audits to aid with program design, coding, and debugging; PowerPoint files for every chapter; and hundreds of ideas for programs and projects.
