Despite Apple's legendary ease of use, the iPad presents many users with a challenge. Its unique design, operating system, and applications--among other things--can be confounding to the very business people who would find it beneficial. The primary audience for this ebook is business people working in a corporate environment who have been issued an iPad by their employer and are looking to integrate the low-cost iPad into their workflow. Topics covered include syncing the iPad with Windows-based devices, working with spreadsheets, developing and presenting slideshows, app recommendations, and more.

This work represents a milestone for the "ULOOB User-centric Wireless Local Loop" project funded by the EU IST Seventh Framework Programme. ULOOP is focused on the robust, secure, and autonomic deployment of user-centric wireless networks. Contributions by ULOOP partners as well as invited tutorials by international experts in the field. The expected impact is to increase awareness to user-centric networking in terms, e.g., of business opportunities and quality of experience, and to present adequate technology to sustain the growth of user-friendly wireless architectures. Throughout the last 3 years, ULOOP has developed enabling technologies for user-centricity in wireless networks, with particular

emphasis on social trust management, cooperation incentives, community building, mobility estimation, and resource management. This work will be of interest to researchers, policymakers, operators, vendors, and end-users interested in the current and future directions of user-centric access networks.

Consumers can be overwhelmed by the myriad wireless options available. This book outlines the six steps of shopping for a wireless service. It then provides a miniguide with reviews of the wireless carriers and options available. It is the only book that is both a comprehensive guide and a source for answers to all of the consumer's questions.

A first edition, *Insiders' Guide to Indianapolis* is the essential source for in-depth travel and relocation information to Indiana's capital city. Written by a local (and true insider), this guide offers a personal and practical perspective of Indianapolis and its surrounding environs.

Autonomous vehicle technology has the potential to significantly improve social welfare. This report addresses the numerous legislative, regulatory, and liability issues this technology will raise.

The cell phone is the fastest-selling consumer

electronic in the world. On a global basis, over 800 million cellular telephones are sold yearly. More camera-equipped cell phones are sold each year than stand alone digital cameras. Rapid development of new technologies is leading to ever more versatile, multipurpose mobile devices, including 3G Internet-enabled cell phones and PDAs. Meanwhile, wireless networking and wireless Internet access are developing and expanding on a global basis at a rapid rate. Booming technologies include such 802.11 standards as Wi-Fi and WiMax, as well as Ultra Wide Band (UWB) and Bluetooth. Telematics, intelligent transportation systems (ITS) and satellite radio will soon create an entertainment, navigation and communications revolution within automobiles and trucks. Meanwhile, RFID (radio frequency identification) will revolutionize wireless tracking, inventory and logistics at all levels, from manufacturing to shipping to retailing. These developments are creating challenges for legacy companies and opportunities for nimble marketers and managers. Plunkett's Wireless, Wi-Fi, RFID & Cellular Industry Almanac 2008 covers such sectors. Our coverage includes business trends analysis and industry statistics. We also include a wireless and cellular business glossary and a listing of industry contacts, such as industry associations and government agencies. Next, we profile hundreds of leading companies. Our 350 company profiles include complete business descriptions and up to 27 executives by name and title.
