Argues that debates about Jewish identity and assimilation are signs of creative potential rather than crisis. Identity Papers argues that contemporary Jewish American literature revises our understanding of Jewishness and Jewish difference. Moving beyond the reductive labeling of texts and authors as "too Jewish" or "not Jewish enough," and focusing instead on narratives that portray Jewish regeneration through feminist Orthodoxy, queerness, off-whiteness, and intermarriage, Helene Meyers resists a

lachrymose view of contemporary Jewish American life. She argues that such gendered, sexed, and raced debates about Jewish identity become opportunities rather than crises, signs of creative potential rather than symptoms of assimilation and deracination. Thus, feminist debates within Orthodoxy are allied to Jewish continuity by Rebecca Goldstein, Allegra Goodman, and Tova Mirvis; the geography of Jewish identity is racialized by Alfred Uhry, Tony Kushner, and Philip Roth; and the works of Jyl Lynn Felman, Judith Katz, Lev Raphael, and Michael Lowenthal queer the Jewish family as they reveal homophobia to be an abomination. Even as *Identity Papers* expands Jewish literary horizons and offers much-needed alternatives to the culture wars between liberal and traditional Jews, it argues that Jewish difference productively troubles dominant narratives of feminist, queer, and whiteness studies. Meyers demonstrates that the evolving Jewish American literary renaissance is anything but provincial; rather, it is engaged with categories of difference central to contemporary academic discourses and our national life. ¶Ultimately, Meyers offers not only nuanced readings of many texts, but also a cogent argument about the generative possibilities for American Jewish futurity through an undoing of what constitutes normative understandings of Jewish bodies, families, and relationships.¶ ¶ *Journal of Jewish Identities* ¶*Identity Papers* is an important, thoughtful text that will appeal to those with an interest in postmodern inquiries into multiculturalism, identity theory, and selfhood.¶ ¶ MELUS ¶This is a sophisticated, nuanced critical study of contemporary Jewish (American) literature Taking an anthropological approach to Jewish and Judaic cultural expression, Meyers provides probing, subtle analyses Highly recommended.¶ ¶CHOICE

The border between intimate memory and historical revelation is explored in this wide-ranging collection, which features original contributions from leading figures in the life writing field from Australia, Canada, Europe, UK, and the USA. The transmission and preservation of personal knowledge and stories from generation to generation frequently requires crossing into the private, contested spaces of memory. The most secret accounts or guarded remnants of information can sometimes lead to the most profound insights. In this context, there is a delicate balance between life writing's role in revealing lives and the desire to be respectful towards them. As the essays in this book attest, exposing secrets, even if humiliating, can be a way of honouring lives. Throughout runs the framing theme of memory as the source of all intergenerational transmission of culture and history—whether relating to family, community, nation, ancestry, or political allegiance—and the importance of the intimate and personal in that process of handing on. This book was originally published as a special issue of *Life Writing*.

How do definitions of literacy in the academy, and the pedagogies that reinforce such definitions, influence and shape our identities as teachers, scholars, and students? The contributors gathered here reflect on those moments when the dominant cultural and institutional definitions of our identities conflict with our other identities, shaped by class, race, gender, sexual orientation, location, or other cultural factors. These writers explore the struggle, identify the sources of conflict, and discuss how they respond personally to such tensions in their scholarship, teaching, and administration. They also illustrate how writing helps them and their students compose alternative identities that may allow the connection of professional identities with internal desires and senses of self. They emphasize how identity comes into play in education and literacy and how institutional and cultural power is reinforced in the pedagogies and values of the writing classroom and writing profession.

This is an expanded edition of Sydney Shoemaker's seminal collection of his work on interrelated issues in the philosophy of mind and metaphysics. It reproduces all of the original papers, many of which are now regarded as classics, and includes four papers published since the first edition appeared in 1984. Themes include the nature of self-knowledge and self-reference, personal identity, persistence over time, properties, mental states, and perceptual experience. A number of the papers, including 'Self-Reference and Self-Awareness', 'Persons and Their Pasts', 'Causality and Properties', and 'The Inverted Spectrum', have remained at the centre of discussion of their topics. Several of the essays in the original collection discuss the ways in which causal considerations enter into the individuation of properties, and three of the added essays - 'Causal and Metaphysical Necessity', 'Realization and Mental Causation', and 'On What There Are' - deal with related themes. The neo-Lockean view of personal identity presented in 'Persons and Their Pasts' is developed with a different emphasis in the added paper 'Self and Substance'. Identity, Cause, and Mind's reappearance will be warmly welcomed by scholars and students alike.

What are we? What is the nature of the human person? Animalism has a straightforward answer to these long-standing philosophical questions: we are animals. After being ignored for a long time in philosophical discussions of our nature, this idea has recently gained considerable support in metaphysics and philosophy of mind. It has also, amongst philosophers, occasioned strong opposition, even though it might be said to be the view assumed by much of the scientific community. Essays on

Animalism is the first volume to be devoted to this important topic and promises to set the agenda for the next stage in the debate. Containing mainly new papers as well as two highly important articles that were recently published elsewhere, this volume's contributors include both emerging voices in the debate and many of those who have been instrumental in shaping it. Some of their contributions defend animalism, others criticize it, still others explore its more general implications.
