coatings, setting the standard in colour and protection since 1792. Our world class portfolio of brands – including Dulux, International, Sikkens and Interpon – is trusted by customers around the globe. We are active in over 150 countries and employ around 34,500 talented people who are

Based on investigations across Europe and North America, this report addresses the key areas of interest to architects, engineers, manufacturers, installers and building owners. Recommendations are given on the specification of appropriate materials (including insurance and guarantee arrangements), design guidance, installation and maintenance and on the need for training of installers. Areas requiring further research and standardisation are also identified.

This publication covers global megatrends for the next 20 years and how they will affect the United States. This is the fifth installment in the National Intelligence Council's series aimed at providing a framework for thinking about possible futures and their implications. The report is intended to stimulate strategic thinking about the rapid and vast geopolitical changes characterizing the world today and possible global trajectories during the next 15-20 years by identifying critical trends and potential discontinuities. The authors distinguish between megatrends, those factors that will likely occur under any scenario, and game-changers, critical variables whose trajectories are far less certain. NIC 2012-001. Several innovations are included in Global Trends 2030, including: a review of the four previous Global Trends reports, input from academic and other experts around the world, coverage of disruptive technologies, and a chapter on the potential trajectories for the US role in the international system and the possible the impact on future international relations. Table of Contents: Introduction 1 Megatrends 6 Individual Empowerment 8 Poverty Reduction 8 An Expanding Global Middle Class 8 Education and the Gender Gap 10 Role of Communications Technologies 11 Improving Health 11 A MORE

Audience: Appropriate for anyone, from businesses to banks, government agencies to start-ups, the technology sector to the teaching sector, and more. This publication helps anticipate where the world will be: socially, politically, technologically, and culturally over the next few decades. Keywords: Global Trends 2030 Alternative Worlds, global trends 2030, Global Trends series, National Intelligence Council, global trajectories, global megatrends, geopolitics, geopolitical changes

The distribution of a liquid in an even, thin protective layer over a surface has for many years been the method adopted for either protecting the substrate and/or enhancing its appearance. Distribution of the coating, or paint, is usually effected by one of three ways: brush, roller or spraying. Liquid paint is widely used in manufacturing industries where invariably some type of coating is deposited on the finished product. Distribution of the paint by atomization into a fine aerosol lends itself very well to substrate coating, and numerous commercial coating systems are available. Some systems use air atomization while others adopt centrifugal forces for disruption of the continuous phase liquid into fine droplets. jg p.12.

This report is intended to stimulate thinking about the rapid and vast geopolitical changes characterizing the world today and possible global trajectories over the next 15 years. As with the NIC's previous Global Trends reports, we do not seek to predict the future, which would be an impossible feat, but instead provide a framework for thinking about possible futures and their implications. In-depth

Download Free Product Data Sheet Interpon

research, detailed modeling and a variety of analytical tools drawn from public, private and academic sources were employed in the production of Global Trends 2030. NIC leadership engaged with experts in nearly 20 countries, from think tanks, banks, government offices and business groups, to solicit reviews of the report.
