Published by Sinauer Associates, an imprint of Oxford University Press. Sensation & Perception introduces students to their own senses, emphasizing human sensory and perceptual experience and the basic neuroscientific underpinnings of that experience. The authors, specialists in their respective domains, strive to spread their enthusiasm for fundamental questions about the human senses and the impact that answers to those questions can have on medical and societal issues.

My Psychology is a fresh approach to introductory psychology that invites students to make a personal connection to the science of psychology. Unlike other texts, My Psychology uses a combination of a relatable writing style and digital technology to make the material real and immediate for readers. Intro psych students live on their smartphones and computers, and My Psychology meets them there with specially produced My Take videos, Chapters Apps, and Show Me More activities. The examples in My Psychology also helps students to understand how core concepts are personally meaningful through thoughtful applications and fresh everyday examples. As part of the book's emphasis on the APA guidelines for undergraduate courses, coverage of culture and diversity is infused throughout the book and highlighted with Diversity Matters flags in every chapter. In addition, a full chapter on Diversity in Psychology explores key topics in depth. In its Second Edition, My Psychology is proven to invigorate the intro psych courses at colleges and universities across the country with its concise and engaging approach. The contemporary examples and perspective connect with today's students, and the smartphone-ready features--coupled with the powerful assessment tools in LaunchPad--make for a powerful new teaching and learning experience. The new edition features almost 1,400 new research citations and new My Take video footage.

Instructor and student evaluations from coast to coast attest to the Dans' captivating writing. These award-winning bestselling authors know how to enthrall students with the subject they love best--psychology. But in the new edition of Introducing Psychology, they go even further to ensure that students won't commit one of the seven sins of memory--forgetting what they just read. Special Cue Questions and Critical Thinking questions give students the opportunity to process psychological concepts and aid their understanding and memory. And if you've ever heard someone parrot a widespread misconception, you'll welcome the new Changing Minds questions, short scenarios which ask students to confront common misunderstandings of psychological phenomena. Now the book that students love to read is as unforgettable as ever!

This is the textbook only without Launchpad. With an author team equally at home in the classroom, in the lab, or on the bestseller list, this book is written to keep students turning the pages. It offers expert coverage of psychology's scientific foundations, but communicates with students in a style that's anything but that of a typical textbook. Introducing Psychology keeps the level of engagement high, with quirky and unforgettable examples, and reminders throughout that the critical thinking skills required to study psychology will serve students well throughout their lives. The fourth edition has been completely retooled for the classroom. For the first time, each chapter section begins with Learning Outcomes to guide students' learning. These outcomes represent the big picture, so readers come away with more than a collection of facts. The new edition also includes the new 'A World of Differences' feature, which highlights interesting and important research on individual differences such as sex, gender, culture and ethnicity in understanding the breadth of psychology. Introducing Psychology can also be purchased with the breakthrough online resource, LaunchPad, which offers innovative media content, curated and organised for easy assignability. LaunchPad's intuitive interface presents quizzing, flashcards, animations and much more to make learning actively engaging.

Over the last several years there has been a growing interest in developing computational methodologies for modeling and analyzing movements and behaviors of 'crowds' of people. This interest spans several scientific areas that includes Computer Vision, Computer Graphics, and Pedestrian Evacuation Dynamics. Despite the fact that these different scientific fields are trying to model the same physical entity (i.e. a crowd of people), research ideas have evolved independently. As a result each discipline has developed techniques and perspectives that are characteristically their own. The goal of this book is to provide the readers a comprehensive map towards the common goal of better analyzing and synthesizing the pedestrian movement in dense, heterogeneous crowds. The book is organized into different parts that consolidate various aspects of research towards this common goal, namely the modeling, simulation, and visual analysis of crowds. Through this book, readers will see the common ideas and vision as well as the different challenges and techniques, that will stimulate novel approaches to fully grasping 'crowds.'

Online Statistics: An Interactive Multimedia Course of Study is a resource for learning and teaching introductory statistics. It contains material presented in textbook format and as video presentations. This resource features interactive demonstrations and simulations, case studies, and an analysis lab. This print edition of the public domain textbook gives the student an opportunity to own a physical copy to help enhance their educational experience. This part I features the book Front Matter, Chapters 1-10, and the full Glossary. Chapters Include:: I. Introduction, II. Graphing Distributions, III. Summarizing Distributions, IV. Describing Bivariate Data, V. Probability, VI. Research Design, VII. Normal Distributions, VIII. Advanced Graphs, IX. Sampling Distributions, and X. Estimation. Online Statistics Education: A Multimedia Course of Study (http://onlinestatbook.com/). Project Leader: David M. Lane, Rice University.

Thus begins market-leading author David Myers' discussion of developmental psychology in Unit 9 of his new Myers' Psychology for AP® Second Edition. With an undeniable gift for writing, Dr. Myers will lead your students on a guided tour of psychological science and poignant personal stories. Dr. Myers teaches, illuminates, and inspires. Four years ago, we published this ground-breaking text which is correlated directly to the AP® course. Today, we build on that innovation and proudly introduce the 2nd AP® Edition. Whether you are new to AP® psychology or have many years under your belt, this uniquely AP® book program can help you achieve more.

The updated 2nd edition of this brief introduction to Psychology, is more accessible and ideal for short courses. This is a brief, accessible introductory psychology textbook. The updated 2nd edition of this clear and brief introduction to Psychology is written by the award-winning lecturer and author Richard Griggs. The text is written in an engaging style and presents a selection of carefully chosen core concepts in psychology, providing solid topical coverage without drowning the student in a sea of details.

As the first of the nation's 78 million baby boomers begin reaching age 65 in 2011, they will face a health care workforce that is too small and woefully unprepared to meet their specific health needs. Retooling for an Aging America calls for bold initiatives starting immediately to train all health care providers in the basics of geriatric care and to prepare family members and other informal caregivers, who currently receive little or no training in how to tend to their aging loved ones. The book also recommends that Medicare, Medicaid, and other health plans pay higher rates to boost recruitment and retention of geriatric specialists and care aides. Educators and health professional groups can use Retooling for an Aging America to institute or increase formal education and training in geriatrics. Consumer groups can use the book to advocate for improving the care for older adults. Health care professional and occupational groups can use it to improve the quality of health care jobs.
