FINALIST FOR THE BOOKER PRIZE & WINNER OF THE L.A. TIMES BOOK PRIZE FOR FICTION and THE ASPEN WORDS LITERARY PRIZE "It was as if Hamid knew what was going to happen to America and the world, and gave us a road map to our future" At once terrifying and "oddly hopeful." "Ayelet Waldman, The New York Times Book Review "Moving, audacious, and indelibly human." "Entertainment Weekly, "A" rating The New York Times bestselling novel: an astonishingly visionary love story that imagines the forces that drive ordinary people from their homes into the uncertain embrace of new lands, from the author of The Reluctant Fundamentalist and the forthcoming The Last White Man. In a country teetering on the brink of civil war, two young people meet—sensual, fiercely independent Nadia and gentle, restrained Saeed. They embark on a furtive love affair, and are soon cloistered in a premature intimacy by the unrest roiling their city. When it explodes, turning familiar streets into a patchwork of checkpoints and bomb blasts, they begin to hear whispers about doors—doors that can whisk people far away, if perilously and for a price. As the violence escalates, Nadia and Saeed decide that they no longer have a choice. Leaving their homeland and their old lives behind, they find a door and step through. . . . Exit West follows these remarkable characters as they emerge into an alien and uncertain future, struggling to hold on to each other, to their past, to the very sense of who they are. Profoundly intimate and powerfully inventive, it tells an unforgettable story of love, loyalty, and courage that is both completely of our time and for all time.

Everything you need to know in a condensed and structured independent study guide specifically designed to prepare you in successfully passing the National Licensing Exam in Marital and Family Therapy. This innovative approach to effective and efficient preparation is tailored to the new format of the National Exam which is now far more application based than knowledge based. As other manuals contain up to 1,200 pages of text covering the entire field of Family Therapy in great detail, this author has condensed the same information down to the bare essentials of what is needed to pass the exam. This is not

meant to serve as a thorough review of everything you already learned in graduate school; instead, it will review such knowledge in ways congruent to what the exam will measure. The philosophy of this manual was to teach you how to pass the exam as opposed to reviewing the textbook. The context contains a review of each primary theory to Marriage & Family Therapy as organized by the knowledge domains stated by the Association for Marital & Family Therapy Regulatory Board. To further grasp how these theories are applied to families (keeping in line with the application-based nature of the licensing exam), the author has provided a glossary containing narratives of each approach applied to the same family vignette. To further differentiate this manual from the other available options, Part I contains an overview of the exam, test-taking strategies and study techniques to ensure that your preparations are effective and efficient. It will also move beyond theory and into the other knowledge domains covered on the exam as well as provide a thorough glossary of all key terms and primary interventions labeled by the theory in which they belong. Finally, the manual includes a Practice Exam with correct answers stated along with a rationale as to why each answer was correct or incorrect. Contents include: Part I: About the Exam, Test-Taking Strategies & Study Techniques. Part II: The History of the Field of Marriage & Family Therapy. Part III: The Theory & Practice of Marriage & Family Therapy. Part IV: Clinical Considerations & Concepts Part V: The Practice Exam Walk into test day feeling confident and prepared after completing this Independent Study Guide. An affordable and effective resource made by a Marriage & Family Therapist for Marriage & Family Therapists.

This book focuses on dilemmas inherent in the practice of assessment in the contemporary context. New forms of assessment are being introduced in all sectors of education and training, and the culture of assessment is shifting. The authors in this volume discuss the practice of assessment, reporting empirical research on modes of assessment within a variety of educational contexts, while also addressing conceptual and theoretical aspects of assessment. Though most publications on assessment do not go beyond one sector or phase of education and only consider assessment in one national context, this volume is cross-sectoral and international in scope. This groundbreaking book illustrates the conceptual and practical dilemmas of assessment and raises issues that are relevant and applicable across a variety of modes of assessment and across various contexts where assessment takes place.

Positive psychology is the scientific study of how human beings prosper and thrive. This is the first book in SLA dedicated to theories in positive psychology and their implications for language teaching, learning and communication. Chapters examine the characteristics of individuals, contexts and relationships that facilitate learning: positive emotional states such as love, enjoyment and flow, and character traits such as empathy, hardiness and perseverance. The contributors present several innovative teaching ideas to bring out these characteristics among learners. The collection thus blends new teaching techniques with cutting-edge theory and empirical research undertaken using qualitative, quantitative and mixed-methods approaches. It will be of interest to SLA researchers, graduate students, trainee and experienced teachers who wish to learn more about language learning psychology, individual differences, learner characteristics and new classroom practices.
