In response to a parliamentary question, Health Minister Helen Whately said 1.68million calls were made to the UK's 119 service in September but only 56 per cent were picked up. 168 comments 1 video

#### Commercial law judgments, South Africa

As the monetary cost of fraud escalates globally, and the ensuing confidence in financial markets deteriorates, the international demand for quality in financial statements intensifies. But what constitutes quality in financial statements? This book examines financial statement fraud, a topical and increasingly challenging area for financial accounting, business, and the law. Evidence shows that accounting anomalies in an organization ' s financial statements diminish the quality and serviceability of financial information. However, an anomaly does not necessarily signal fraud. Financial statement fraud is intended to mislead shareholders and other stakeholders. In this book, elements that underpin diversity of accounting anomalies likely found in fraudulent financial accounting statements are revealed. Multiple research methods are used in the analysis of selected international fraud cases, each illustrating examples of financial statement fraud, including: revenue recognition, overstatement and/or misappropriation of assets, understatement of expenses and liabilities, disclosure fraud, bribery and corruption. Additionally, the phoenix phenomenon with regard to fraud in financial accounting is investigated. Drawing on documented observations of commercial and legal cases globally this study highlights the necessity for continued development of financial audit practices and other audit services.

#### Business in Falkland Islands for Everyone: Practical Information and Contacts for Success

This book seeks to re-examine John Major ' s leadership using techniques developed through Presidential Studies: namely using Fred Greenstein ' s seminal study of Presidential Leadership, The Presidential Difference, and its six criteria for leadership (public communicator, organisational capacity, political skill, public policy vision, cognitive style, and, finally, emotional intelligence). It is through Greenstein ' s model that a fresh look can be taken at not only Major ' s time in office, but equally the man himself, which proves to be just as revealing. Major ' s tenure has often been characterised as being weak and incompetent, as he presided over a sleaze-ridden and divided party on the issue of Europe. With almost a quarter of a century having passed since Major left office, it looks to be an appropriate moment to re-assess his premiership and important role in the recent seismic events surrounding the 2016 Brexit referendum and its outcome.

This book constitutes the refereed proceedings of the 15th International Conference on Computational Methods in Systems Biology, CMSB 2017, held in Darmstadt, Germany, in September 2017. The 15 full papers, 4 tool papers and 4 posters presented together with 1 invited talk were carefully reviewed and selected from 41 regular paper submissions. Topics of interest include formalisms for modeling biological processes; models and their biological applications; frameworks for model verification, validation, analysis, and simulation of biological systems; high-performance computational systems biology and parallel implementations; model inference from experimental data; model integration from biological databases; multi-scale modeling and analysis methods; and computational approaches for synthetic biology.

This volume presents the proceedings of the International Conference on Health Informatics (ICHI). The conference was a new special topic conference initiative by the International Federation of Medical and Biological Engineering (IFMBE), held in Vilamoura, Portugal on 7-9 November, 2013. The main theme of the ICHI2013 was " Integrating Information and Communication Technologies with Biomedicine for Global Health ". The proceedings offer a unique forum to examine enabling technologies of sensors, devices and systems that optimize the acquisition, transmission, processing, storage, retrieval of biomedical and health information as well as to report novel clinical applications of health information systems and the deployment of m-Health, e-Health, u-Health, p-Health and Telemedicine.
