Intensely private radio personality Art Bell, who lives in the middle of the desert 65 miles west of Las Vegas--where he broadcasts his radio shows--finally comes forward with his fascinating autobiography.

Teens form an all-girl band in the face of an impending comet. A woman faces giant spiders to collect silk and protect her family. New friends take their radio show on the road in search of plague survivors. A man seeks love in a fading world. How would you survive the apocalypse? Defying Doomsday is an anthology of apocalypse fiction featuring disabled and chronically ill protagonists, proving it's not always the "fittest" who survive - it's the most tenacious, stubborn, enduring and innovative characters who have the best chance of adapting when everything is lost. In stories of fear, hope and survival, this anthology gives new perspectives on the end of the world, from authors Corinne Duyvis, Janet Edwards, Seanan McGuire, Tansy Rayner Roberts, Stephanie Gunn, Elinor Caiman Sands, Rivga Rafael, Bogi Takács, John Chu, Maree Kimberley, Octavia Cade, Lauren E Mitchell, Thoraiya Dyer, Samantha Rich, and K L Evangelista.

Offers a collection of true facts about animals, food, science, pop culture, outer space, geography, and weather.

The true story of two mass-casualty incidents that occurred within days of each other at a US Air Force base. Using the words of the people who experienced the tragedies, the book provides in-depth look at the before, during and after of a preventable active-shooter incident and an avoidable fatal plane crash. The base psychiatrist knew the airman was dangerous. "This is the kind of patient who ... one day ... he's going to come back and kill you." Aircrews knew the rogue pilot was dangerous. "We predicted the worst air-show disaster in history when we found out that he was gonna fly." Written by Andy Brown, the man who ended the killing spree, the result of more than seven years of research. Brown "masterfully weaves" the two stories together in a powerful narrative. He also reveals the preparations he made that enabled him to end a pistol-versus-rifle gunfight with a 70 yard shot from his handgun. Part true crime, part law-enforcement biography memoir and part military history. Warnings Unheeded is presented in an objective style that shows what can happen when authorities become complacent, when the precursors of violence are ignored and the lessons from history are forgotten.

Offers a collection of true facts about animals, food, science, pop culture, outer space, geography, and weather.

This book is dedicated to Aristid Lindenmayer on the occasion of his 60th birthday on November 17, 1985. Contributions range from mathematics and theoretical computer science to biology. Aristid Lindenmayer introduced language-theoretic models for developmental biology in 1968. Since then the models have been customarily referred to as L systems. Lindenmayer's invention turned out to be one of the most beautiful examples of interdisciplinary science: work in one area (developmental biology) induces most fruitful ideas in other areas (theory of formal languages and automata, and formal power series). As evident from the articles and references in this book, the interest in L systems is continuously growing. For newcomers the first contact with L systems usually happens via the most basic class of L systems, namely, DOL systems. Here "0" stands for zero context between developing cells. It has been a major typographical problem that printers are unable to distinguish between 0 (zero) and 0 (oh). Thus, DOL was almost always printed with "oh" rather than "zero", and also pronounced that way. However, this misunderstanding turned out to be very fortunate. The wrong spelling "DOL" of "DOL" could be read in the suggestive way: DO L Indeed, hundreds of researchers have followed this suggestion. Some of them appear as contributors to this book. Of the many who could not contribute, we in particular regret the absence of A. Ehrenfeucht, G. Herman and H.A. Maurer whose influence in the theory of L systems has been most significant.

Consummate home cook and magazine editor Suzanne Gibbs shows us how to use a pressure cooker to create slow-cooked flavour in a fast-paced world. Pressure cookers allow us to cook quickly, cheaply and efficiently. The food is cooked in liquid at high temperatures, which shortens cooking time by up to 70 per cent. Because the method seals in flavour and nutrition, cheaper ingredients can be used to great effect. Here Suzanne selects more than 80 of her favourite pressure-cooker recipes, and describes the process from beginning to end. Learn how to cook an osso bucco in 25 minutes, a chicken tagine in 15 minutes and a delicious bread and butter pudding in 20 minutes. Packed with information on practicalities, such as choosing, using and cleaning your cooker, and fully illustrated with beautiful photography. The Pressure Cooker Recipe Book is a must-have guide for anyone balancing the constraints of time and money with a desire to create delicious healthy meals for themselves, their friends and their families.

"I never believed in love. I am happy the way my life is right now." Jake Ryan did not look for love nor did he need love in his life until he met Rose. Rose Thompson, an independent woman who had been burned by love once but still wishes to be in love. What will happen when two polar opposites meet? The only way to know what will happen in future is to let it unfold.
