Drucker on Asia is written in two parts (Times of Challenge & Time to Reinvent) which is the result of a dialogue between Peter Drucker and Isao Nakauchi on international themes. Drucker On Asia is the result of extensive dialogue between two of the world's leading business figures, Peter F Drucker and Isao Nakauchi. Their dialogue considers the changes occurring in the economic world today and identifies the challenges that free markets and free enterprises now face with specific reference to China and Japan. \* What do these economic changes mean for an individual country and its economy? \* What do these changes mean to Japan? \* What do these changes mean to society; the individual company; the individual professional and executive? These are the questions that Drucker and Nakauchi address in their brilliant insight into the future economic role of Asia.

This text uses the theory of the firm to integrate and link economic theory (microeconomics and macroeconomics), decision sciences (mathematical economics and econometrics), and the functional areas of business (accounting, finance, marketing, personnel or human resource management, and production) and shows how all of these topics are crucial components of managerial decision making. The text is divided into five parts-Part I examines the nature and scope of managerial economics, Part II analyses demand, Part III presents the theory and measurement. It covers the full range of optimization techniques used in managerial decision making. The book offers extensive end-chapter material in the form of the summary, discussion questions, problems, chapter appendixes along with appendix problems, supplementary readings, and Internet site addresses. This seventh edition includes new sections, new case studies, some of which are India based, and five new longer Indian integrated case studies. In addition, the existing case studies, supplementary readings, and Internet site addresses have been revised.

The Future of Industrial Man is the only book by Peter Drucker in which he systematically develops a basic social theory. He presents the requirements for any society to be functioning and legitimate, and then applies these general concepts to the special case of the industrial society. In his new introduction, Drucker explains that his reference to mercantilism in The Future of Industrial Man can today be called neoconservatism, which, he asserts, denies rather than affirms the reality of industrial and postindustrial society. Drucker outlines the major shifts of previous centuries. He describes the move from an agrarian to an industrial economy, illustrates the structure and dynamics of this new industrial order, and warns of the abuses inherent in the system if attempts are made to maintain it under anachronistic social conventions. He emphasizes the fact that the new industrial order must operate under a "legitimate" system of political power supported by social authority. He discusses the particular roles of the owners, the workers, the managers—the corporation itself—as he pinpoints the problem that he considers the most central and the most critical: how to maintain the continuing freedom of the individual in an increasingly intricate, bureaucratized world. Following the initial publication of this work, Jacques Barzun wrote in The New Republic, "Here is a book which is so perfectly planned and so transparently written as to read with almost indecent ease. . . . Each page is the fruit of much learning and long reflection. It should accordingly be studied, pondered over, analyzed word by word." According to W. H. Chamberlain of The Atlantic Monthly, "[Drucker] possesses a fund of historical and economic knowledge." The Future of Industrial Man is a landmark study by a noted analyst of the modern corporation. It is of continuing importance to economists, industrial studies scholars, and professional
