SMART is a mnemonic acronym, giving criteria to guide in the setting of objectives, for example in project management, employee-performance management and personal development. The letters S and M generally mean specific and measurable. Possibly the most common version has the remaining letters referring to achievable (or attainable), relevant, and time-bound.

SMART is an acronym that stands for Specific, Measurable, Achievable, Relevant and Time-based. Each element of the SMART framework works together to create a goal that is carefully planned, clear and trackable. You may have set goals in your past that were difficult to achieve because they were too vague, aggressive or poorly framed.

A new vision of the future of games and game design, enabled by AI. Can games measure intelligence? How will artificial intelligence inform games of the future? In *Playing Smart*, Julian Togelius explores the connections between games and intelligence to offer a new vision of future games and game design. Video games already depend on AI. We use games to test AI algorithms, challenge our thinking, and better understand both natural and artificial intelligence. In the future, Togelius argues, game designers will be able to create smarter games that make us smarter in turn, applying advanced AI to help design games. In this book, he tells us how. Games are the past, present, and future of artificial intelligence. In 1948, Alan Turing, one of the founding fathers of computer science and artificial intelligence, handwrote a program for chess. Today we have IBM's Deep Blue and DeepMind's AlphaGo, and huge efforts go into developing AI that can play such arcade games as Pac-Man. Programmers continue to use games to test and develop AI, creating new benchmarks for AI while also challenging human assumptions and cognitive abilities. Game design is at heart a cognitive science, Togelius reminds us—when we play or design a game, we plan, think spatially, make predictions, move, and assess ourselves and our performance. By studying how we play and design games, Togelius writes, we can better understand how humans and machines think. AI can do more for game design than providing a skillful opponent. We can harness it to build game-playing and game-designing AI agents, enabling a new generation of AI-augmented games. With AI, we can explore new frontiers in learning and play.

Are You Scaring Your People into Mediocrity? All leaders want to outperform, outsell, and outinnovate the competition. And most teams are fully capable of doing so. The problem: we consistently say and do things that spark unconscious fears and keep our people stuck in their Critter State. This primitive fight, flight, or freeze mode distills all decision making to one question: What will keep me safest? Lying low, sucking up, procrastinating, and doing a good enough job may keep employees breathing, but it doesn't make for vital organizations. Leaders have to get their people unstuck and fully engaged, replacing their old, limiting mental patterns with new patterns that foster optimal performance. New York Times bestselling author and applied neuroscience expert Christine Comaford knows what it takes to move people from the Critter State into the Smart State, where they have full access to their own creativity, innovation, higher consciousness, and emotional engagement. When an entire culture maintains that state, it becomes what she calls a SmartTribe. Focused. Accountable. Collaborative. Imbued with the energy and passion to solve problems and do what needs doing, again and again and again. Comaford brings to this book more than thirty years of company-building experience, combined with her expertise in behavioral modification and organizational development. She has helped hundreds of leaders navigate rapid growth, maximize performance, resolve internal conflicts, and execute turnarounds with the full support of their people. Now she shares potent yet easy-to-learn neuroscience techniques that will help you do the same. You'll learn how to move your team forward and reach your next revenue inflection point using the five key Accelerators of the Smart State—focus, clarity, accountability, influence, and sustainability. You'll get better at anticipating and moving through your own stuck spots and those of your people. Using her proven system, Comaford's clients have already created hundreds of millions of dollars in new value. They've seen their revenues and profits increase by up to 210% annually; individuals become up to 50% more productive and 100% more accountable; marketing demand generation grow by up to 237%; new products and services created up to 48% faster; and sales close up to 50% faster. They spot changes in their markets more quickly, then pounce on them to create the future they want. Ultimately, SmartTribes will help you and your team achieve optimal performance and engagement—brilliance—and leave competitors in the dust.

Not all children learn the same way. This book explains the six patterns of learning and teaches parents how to identify their child's pattern so they can help them think, learn, and communicate to the best of their ability. The book also provides specific guidelines to enhance communication with children of each pattern.

- Identify and eliminate negative patterns holding you back
- Plan, act, and achieve goals with greater precision and speed

Whether you want to increase sales, bolster creativity, or better navigate life's unexpected changes, *Get Smart!* will help you tap into your powerful mental resources to obtain the results you want and reap the rewards successful people enjoy.

In the first half of the twenty-first century, giving to family and community foundations alone will be ten times in today's dollars what it was throughout the entire twentieth century. Yet despite tremendous innovation in the social sector, philanthropy's natural state is under-performance. Not since Andrew Carnegie wrote *The Gospel of Wealth* has a book been written that provides practical guidance for donors to get the most impact from their giving. Almost a decade ago, Thomas J. Tierney left Bain & Company to co-found The Bridgespan Group, a nonprofit focused on helping donors and nonprofit leaders to develop and execute strategies to accelerate social change. In *Give Smart*, Tierney pools his hands-on knowledge with philanthropy expert Joel L. Fleishman to create a much-needed primer for philanthropists and the nonprofit organizations they support. Drawing from personal experiences, testimonials, and Bridgespan's case studies, including those of the Bill and Melinda Gates Foundation and the John D. and Catherine T. MacArthur Foundation, *Give Smart* picks up where Jim Collins' *Good to Great* and the Social Sectors left off and presents the first in-depth, expert guide for engaged donors and nonprofit leaders.

Funny because it's true. From the creator of the viral sensation "10 Tricks to Appear Smart in Meetings" (5+ million views and hundreds of thousands of shares) comes the must-have book you never knew you needed, *100 Tricks to Appear Smart in Meetings*. In it, you will learn how to appear smart in less than half the time it takes to actually learn anything. You know those subtle tricks your coworkers are all guilty of? The constant nodding, pretend concentration, useless rhetorical questions? These tricks make them seem like they know what they're doing when in fact they have no clue. This behavior is so ingrained, so subtle, and so often mistaken for true intelligence that identifying it, calling it out, or compiling it into an exhaustive digest has never been attempted. Until now. Complete with illustrated tips, examples, and scenarios, *100 Tricks* gives you actionable ways to use words like "actionable," in order to

sound smart. Every type of meeting is covered, from general meetings where you stopped paying attention almost immediately, to one-on-one meetings you zoned out on, to impromptu meetings you were painfully subjected to at the last minute. It's all here. Open this book to any page and find an easy-to-digest trick with an even easier-to-digest illustration, guiding you on: how to nail the big meeting by pacing and nodding most effective ways to listen to your coworkers while still completely ignoring them the key to making your presentations "interactive." If you hadn't noticed these behaviors before, you will see them now--from your colleagues, your managers, and soon yourself. Each trick is a mirror to the reality of what happens in meetings, told in the form of hilariously bad advice--advice that you might just want to take. But probably not. But maybe.

Drawing on the author's own experiences, as well as case studies and interviews, this guide illuminates the transition back to emotional well-being into a positive tool for growth and new success
