You can't put a price on love - so they say... When a medical condition threatens to tear apart Lanie Talbot's family, she makes the ultimate sacrifice. With no time and no other option, Lanie puts herself up for sale at an underground, high-end establishment where women are auctioned off to influential, wealthy men with more money than sense. Enter Noah Crawford: millionaire business mogul and Chicago's most eligible bachelor. But Noah's distrust in relationships has led him to make a very desperate decision of his own - purchasing a woman to satisfy his every desire. No strings attached, no heartbreak, and no way anyone will ever know. Just two million dollars to have his wicked way with Lanie Talbot for two years . . . Lani and Noah's relationship is explosive. When they fight, they take no prisoners. When they love, they show no mercy. When they combine the two, they never want to leave each other's arms. But did they both get more than they bargained for? A MILLION DIRTY SECRETS is the first part of a scorching hot romantic duet that promises to be this generation's Pretty Woman.

Fundamentals of Forensic Science, Third Edition, provides current case studies that reflect the ways professional forensic scientists work, not how forensic academicians teach. The book includes the binding principles of forensic science, including the relationships between people, places, and things as demonstrated by transferred evidence, the context of those people, places, and things, and the meaningfulness of the physical evidence discovered, along with its value in the justice system. Written by two of the leading experts in forensic science today, the book approaches the field from a truly unique and exciting perspective, giving readers a new understanding and appreciation for crime scenes as recent pieces of history, each with evidence that tells a story. Straightforward organization that includes key terms, numerous feature boxes emphasizing online resources, historical events, and figures in forensic science Compelling, actual cases are included at the start of each chapter to illustrate the principles being covered Effective training, including end-of-chapter questions - paired with a clear writing style making this an invaluable resource for professors and students of forensic science Over 250 vivid, color illustrations that diagram key concepts and depict evidence encountered in the field

The poets whose work is included in this anthology were born in the 1960s, when Lithuania was part of the Soviet Union, and mostly started publishing after the country achieved independence in 1991. Unlike their predecessors, the poets of this generation are not concerned with political themes but rather with issues of aesthetics and existential quests. While each follows his or her unique path, they all share a penchant for experimentation and an ironic, post-modern perspective, following European literary trends rather than domestic poetic traditions.
