winning teaching in nursing a guide for faculty 5th edition recommended by the nln for comprehensive cne prep this insightful text is the only one of its kind to cover all three components of teaching instruction curriculum and evaluation as it walks through the day to day challenges of.

This complete faculty guide covers the four major components of the educator role - teaching, curriculum, information technology, and evaluation of students and programs - with comprehensive, contemporary guidelines to help you develop the educator competencies needed to ensure your success in today's complex health care and academic environments. This respected title is also one of the National League for Nursing's recommended resources for nurses preparing to take the Certified Nurse Educator examination. Nationally recognized contributing authors share their expertise to bring you the best and most comprehensive information available. Presents innovative models of clinical teaching that show you how to effectively teach in an interdisciplinary setting, how to evaluate students in the clinical setting, and how to adapt your teaching for community-based practice.li> Strategies to promote critical thinking and active learning, including evaluation techniques, lesson planning, and constructing examinations, help you ensure students can apply and synthesize nursing content to make clinical decisions.li> Web links with numerous resources related to each chapter topic, available through the Evolve website, provide even more learning opportunities. Managing the Learning Environment chapter addresses classroom management and control, motivating and engaging students, and handling disruptive or problem students. Multicultural Education chapter provides strategies for effectively teaching and communicating with a culturally diverse student population. An entire chapter on simulations presents the development, implementation, and evaluation of simulations so you can successfully integrate this teaching method into your course. Reflecting on the Evidence feature at the end of each chapter provides questions that are perfect for classroom and online discussion.

The perfect all-in-one guide for future nurse educators! The award-winning Teaching in Nursing: A Guide for Faculty, 6th Edition prepares you for the day-to-day challenges of teaching future nurses for practice in today's rapidly evolving healthcare system. This comprehensive resource is the only one of its kind to cover all four components of nursing education: teaching and learning, curriculum, evaluation, and technology-empowered learning. You'll benefit from the expert guidance on such key issues as curriculum and test development, diverse learning styles, the redesign of healthcare systems, and advances in technology and information. Plus, the 6th edition includes a unique new chapter on Global Health and Curricular Experiences along with updated information on technology-empowered learning, the flipped classroom, interprofessional education, interprofessional collaborative practice, and much more. Comprehensively addresses all four components of nursing education including teaching and learning, curriculum, evaluation, and technology-empowered learning. Coverage of concept-based curricula includes strategies on how to approach and implement concept-based instruction. Pedagogical aids include Evidence-Based Teaching boxes, covering such issues as how to do evidence-based teaching, applications of evidence-based teaching, implications for faculty development, administration, and the institution; and how to use the open-ended application questions at the end of each chapter for faculty-guided discussion. Strategies to promote critical thinking and active learning are incorporated throughout the text, highlighting various evaluation techniques, lesson planning insights, and tips for developing examinations. Guidance on teaching in diverse settings addresses such topics as the models of clinical teaching, teaching in interdisciplinary settings, how to evaluate students in the clinical setting, and how to adapt teaching for community-based practice. Strong emphasis on teaching clinical judgment, new models of clinical education, and responding to needs for creating inclusive multicultural teaching-learning environments. NEW! Updated content throughout reflects the latest evidence-based guidelines for best practices in teaching and learning. NEW! UNIQUE chapter on Global Health and Curricular Experiences focuses on internationalization of the nursing curriculum with an emphasis on leading international learning experiences; policies, procedures, and guidelines for overseas study and global and health competencies for health professions programs. NEW! Enhanced pedagogy includes additional illustrations, tables, and boxes. NEW! Expanded interprofessional education chapter, provides you with strategies for effective teaching in an interprofessional healthcare environment.

Prepare for success as a nurse educator. Recommended by the National League for Nursing for comprehensive Certified Nurse Educator preparation, this resource is the only book of its kind to cover all three components of teaching: instruction, curriculum, and evaluation. As it walks you through the day-to-day challenges of teaching, it provides guidance on such topics curriculum and test development, diverse learning styles, the redesign of healthcare systems, and advancements in technology and information. This new edition adds updated information reflecting the latest trends and advances in both education and nursing.--Adapted from back cover.

Due to the growing nursing faculty shortage, clinicians are being recruited directly from the practice setting for clinical teaching without formal training in educational strategies. Handbook of Clinical Teaching in Nursing and Health Care serves as a quick-reference for support of clinical teaching for nurses. It allows a clinical instructor to identify a question about clinical teaching and quickly get ideas about how to effectively handle a situation or create the best learning environment within the clinical context.

2011 AJN Book of the Year Winner in Nursing Education! Updated, revised, and expanded, this fourth edition of a "survival manual" for new teachers offers the most current thinking in nursing education, from practical nursing, to baccalaureate and master's programs. It also serves as a comprehensive guide for novice educators in classroom and clinical teaching settings. Chapters offer helpful strategies for making clinical assignments, preparing lectures and seminars, all aspects of testing and grading, supervision, facilitating group study, selecting textbooks, guiding independent study, and helping students improve their writing skills. This fourth edition also features best practices and lessons learned from partnerships between university and clinical settings, and contains new strategies for conducting online teaching, including the use of technology. Specific indicators help educators identify appropriate lessons for different course levels. The guide additionally provides links to online resources in each chapter, including some with revised templates for checklists and rubrics. Key Features Distills best practices and lessons learned from academic and clinical world partnerships Serves as a quick refresher for the experienced educator reentering a classroom or clinical teaching assignment Addresses new cross-disciplinary "team" approach to assessment and intervention Features links to online resources in each chapter, including revised templates for checklist and rubrics along with a digital adjunct for educator use Authored by noted national and international experts in nursing education

Named a 2013 Doody's Core Title and Essential Purchase! Praise for the Third Edition: "I recommend this book as an introduction to new educators involved in clinical teaching." -Journal for Nurses in Staff Development The fourth edition of this highly acclaimed text continues to provide a comprehensive framework for planning, guiding, and evaluating learning activities for graduate and undergraduate nursing students in numerous clinical settings. A respected resource for clinical faculty, it addresses the distinct requirements of clinical learning as opposed to classroom learning and provides proven strategies to maximize clinical education. The revision features expanded content on teaching graduate students, regulatory issues affecting distance education, and the use of social media. It covers establishing and using dedicated education units (DEUs), the challenges of student access to electronic health records and documentation of care, and reducing the demands of clinical staff members when multiple students rotate through a particular setting. Additionally, this edition provides guidelines for using preceptors, evaluating multimedia, and observing students in practice: sample observation guidelines, learning assignments, and clinical learning activities; and sample policies for clinical evaluation and adherence to professional conduct standards. It includes the latest revisions of the NCLEX test plan and the AACN Essentials guidelines for nursing education. The instructor?s manual, which includes learning activities for each chapter and teaching suggestions, and PowerPoint presentations accompany the text. New to the Fourth edition: Two completely new chapters: the first "Developing Clinical Learning Sites," and the second "Pedagogical Technologies for Clinical Education" Expanded approaches for meeting the clinical needs of graduate students Regulatory issues affecting distance education across state lines Using social media Discussion of benefits of DEUs and practical suggestions for developing them as clinical teaching sites Important content regarding the NLN CNETM Examination Detailed Test Blueprint Challenges of student access to electronic health records Guidelines for using preceptors, evaluating multimedia, and student observation Sample observation guidelines, learning assignments, and clinical learning activities and sample policies for clinical evaluation and professional conduct standards

Delivers specific guidelines for implementing human caring within teaching practices along with a wealth of examples Grounded in the belief that translating caring science within teaching practices will humanize nursing education, this important book emphasizes the ways in which teachers can translate Human Caring and Caritas in order to include strategies for establishing authentic caring pedagogical relationships with their students. It aims to strengthen Human Caring as the basis for humanitarian teaching and to infuse the learning environment with caring practices for both students and teachers. The work provides an antidote for the continuous dominant biomedical and behavioral paradigm in nursing education. It includes specific guidelines for implementing Human Caring ethics, ontology, and epistemology throughout the teaching-learning community and describes how to translate caring values and assumptions into living Caritas as the nurse teachers' moral ideal and praxis of authentic caring pedagogical relationships. Pragmatic examples provided by administrators, teachers, and students illustrate the value of a humanitarian caring science paradigm for nursing education and caring praxis. Key Features: Delivers an internationally renowned scholars' perspective on teaching grounded in Human Caring Includes exemplars of educators' lived teaching experiences guided by their caring pedagogical praxis Provides examples of students' lived learning experiences within a caring- teaching environment Offers reflective practice exercises for nurse teachers to enhance their caring pedagogical relationships with students Provides guided caring artistic activities to promote ways of knowing, doing, being, and becoming in nursing education

Designed to teach nurses about the development, motivational, and sociocultural differences that affect teaching and learning, this text combines theoretical and pragmatic content in a balanced, complete style. --from publisher description.

The new edition of this award winning text helps address the increased pressure that the NCLEX and other certification exams are placing on nursing students and faculty. The Nurse Educator's Guide to Assessing Learning Outcomes, 2nd Edition guides classroom educators through the process of developing effective classroom exams and individual test items.
