The Age of Wonder is a colorful and utterly absorbing history of the men and women whose discoveries and inventions at the end of the eighteenth century gave birth to the Romantic Age of Science. When young Joseph Banks stepped onto a Tahitian beach in 1769, he hoped to discover Paradise. Inspired by the scientific ferment sweeping through Britain, the botanist had sailed with Captain Cook in search of new worlds. Other voyages of discovery—astronomical, chemical, poetical, philosophical—swiftly follow in Richard Holmes's thrilling evocation of the second scientific revolution. Through the lives of William Herschel and his sister Caroline, who forever changed the public conception of the solar system; of Humphry Davy, whose near-suicidal gas experiments revolutionized chemistry; and of the great Romantic writers, from Mary Shelley to Coleridge and Keats, who were inspired by the scientific breakthroughs of their day, Holmes brings to life the era in which we first realized both the awe-inspiring and the frightening possibilities of science—an era whose consequences are with us still. **BONUS MATERIAL:** This ebook edition includes an excerpt from Richard Holmes's *Falling Upwards*.

The Age of Wonder is a colorful and utterly absorbing history of the men and women whose discoveries and inventions at the end of the eighteenth century gave birth to the Romantic Age of Science. Through the lives of William Herschel and his sister Caroline, who forever changed the public conception of the solar system; of Humphry Davy, whose near-suicidal gas experiments revolutionized chemistry; and of the great Romantic writers, from Mary Shelley to Coleridge and Keats, who were inspired by the scientific breakthroughs of their day, Holmes brings to life the era in which we first realized both the awe-inspiring and the frightening possibilities of science—an era whose consequences are with us still. **BONUS MATERIAL:** This ebook edition includes an excerpt from Richard Holmes's *Falling Upwards*.

Shortlisted for the Samuel Johnson Prize and winner of the Royal Society Prize for Science Books, Richard Holmes's dazzling portrait of the age of great scientific discovery is a groundbreaking achievement.

Shortlisted for the BBC Samuel Johnson Prize for Non-Fiction and the Royal Society Prize for Science Books Richard Holmes, prize-winning biographer of Coleridge and Shelley, explores the scientific ferment that swept across Britain at the end of 18th century in this ground-breaking new biography. 'The Age of Wonder' is Richard Holmes's first major work of biography in over a decade. It has been inspired by the scientific ferment that swept through Britain at the end of the eighteenth century, 'The Age of Wonder' and which Holmes now radically redefines as 'the revolution of Romantic Science'. The book opens with Joseph Banks, botanist on Captain Cook's first Endeavour voyage, stepping onto a Tahitian beach in 1769, hoping to discover Paradise. Many other voyages of discovery swiftly follow, while Banks, now President of the Royal Society in London, becomes our narrative guide to what truly emerges as an Age of Wonder. Banks introduces us to the two scientific figures that dominate the book: astronomer William Herschel and chemist Humphry Davy. Herschel's tireless dedication to the stars, assisted (and perhaps rivalled) by his comet-finding sister Caroline, changed forever the public conception of the solar system, the Milky Way galaxy and the meaning of the universe itself. Davy first shocked the scientific community with his near-suicidal gas experiments in Bristol, then went on to save thousands of lives with his Safety Lamp and established British chemistry as the leading professional science in Europe. But at the cost, perhaps, of his own heart. Holmes proposes a radical vision of science before Darwin, exploring the earliest ideas of deep time and deep space, the creative rivalry with the French scientific establishment, and the startling impact of discovery on great writers and poets such as Mary Shelley, Coleridge, Byron and Keats. With his trademark sense of the human drama, he shows how great ideas and experiments are born out of lonely passion, how scientific discoveries (and errors) are made, how intense relationships are forged and broken by research, and how religious faith and scientific truth collide. The result is breathtaking in its originality, its story-telling energy, and not least, in its intellectual significance.

Age of Wonders: Exploring the World of Science Fiction gives an insider's view of the strange and wonderful world of science fiction, by one of the most respected editors in the field, David G. Hartwell (1941-2016). David G. Hartwell edited science fiction and fantasy for over twenty years. In that time, he worked with acclaimed and popular writers such as Robert A. Heinlein, Poul Anderson, Frank Herbert, Roger Zelazny, Robert Silverberg, Gene Wolfe, Nancy Kress, L.E. Modesitt, Terry Bisson, Lisa Goldstein, and Philip Jose Farmer, and discovered hot new talents like Kathleen Ann Goonan and Patrick O'Leary. Now in Age of Wonder, Hartwell describes the field he loved, worked in, and shaped as editor, critic, and anthologist. Like those other American art forms, jazz, comics, and rock 'n' roll, science fiction is the product of a rich and fascinating subculture. Age of Wonder is a fascinating tour of the origins, history, and culture of the science fiction world, written with insight and genuine affection for this wonder-filled literature, and addressed to newcomers and longtime SF readers alike. Age of Wonder remains "the landmark work" Roger Zelazny called the first edition. The book contains sections that offer advice on teaching courses in science fiction, disquisitions on the controversial subgenre of hard SF, and practical explanations of the economics of publishing science fiction and fantasy. Age of Wonder still lives up to Hugo and Nebula Award winner Vonda McIntyre's description: "An entertaining and provocative book that will inspire discussion and argument for years to come."

A past long forgotten Legends return to life A reputation to restore In 500 years, civilization has come far since the time known as The Great Event. Ancient ruins remain scattered across the world of Solaris, echoes of a long-forgotten past. Siblings Amber, Zander, and Quinn have known only peace

## Get Free The Age Of Wonder How The Romantic Generation Discovered The Beauty And Terror Of Science

growing up in the mountain town of Thunder Ridge. Each works diligently to master their talents. Their futures seem secure. Until... news from Thunder Ridge sends shockwaves across the land. A creature of legend has been born. Drawing unwanted attention, the mythical creature becomes the target of a syndicate group known as the Dragon Clan. With a recent failure, clansman, Rex, has a reputation to restore. Worlds collide as Amber, Zander, and Quinn find themselves thrust into the middle of something far larger than themselves. As their environment transforms from a peaceful life at Thunder Ridge, a tempest brews on the horizon threatening to dramatically alter life as they know it. They begin to wonder if they have stumbled into the midst of a gathering storm.

By the middle 1800s, toys were appearing in forms that drew upon--and that inspired--advances in areas such as optics, biology, geography, transportation, and automation. In these decades, too, a new type of wonder tale was being brought to maturity by a Poe-inspired Jules Verne. The modern wonder tale's highly-charged vision expressed the hopes and the fears, and the delights and the traumas, engendered by "new worlds idealism"--that Western pursuit of both mechanical and geographical conquest. Exploring realms belonging to childhood, literature, science, and history, this innovative study weaves together the histories of wonder tales and children's toys, focusing specifically on their modern aspects and how they reflect and express the social attitudes of that time period beginning around 1859 and ending around 1957.

"Now a major motion picture! Includes full-color movie photos and exclusive content!"--Dust jacket.

Follows the activities of two children spending their summer vacation on an island off the coast of Maine.

From beloved, award-winning poet Aimee Nezhukumatathil comes a debut work of nonfiction—a collection of essays about the natural world, and the way its inhabitants can teach, support, and inspire us. As a child, Nezhukumatathil called many places home: the grounds of a Kansas mental institution, where her Filipina mother was a doctor; the open skies and tall mountains of Arizona, where she hiked with her Indian father; and the chillier climes of western New York and Ohio. But no matter where she was transplanted—no matter how awkward the fit or forbidding the landscape—she was able to turn to our world's fierce and funny creatures for guidance. “What the peacock can do,” she tells us, “is remind you of a home you will run away from and run back to all your life.” The axolotl teaches us to smile, even in the face of unkindness; the touch-me-not plant shows us how to shake off unwanted advances; the narwhal demonstrates how to survive in hostile environments. Even in the strange and the unlovely, Nezhukumatathil finds beauty and kinship. For it is this way with wonder: it requires that we are curious enough to look past the distractions in order to fully appreciate the world's gifts. Warm, lyrical, and gorgeously illustrated by Fumi Nakamura, *World of Wonders* is a book of sustenance and joy.
