Beginning of the End (1957) - IMDb

The year was 1969, and Nassau was in for the wave of this energetic young band called Beginning Of The End. The band, according to lead singer Raphael, was quite a unique group inasmuch as it was heavily influenced by the pop culture that was very vibrant in the United States. The flower power movement and the hippie generation gravitated towards artists like Marvin Gaye, Impressions, Jerry ...

beginning of the end Fig. the start of the termination of something or of someone's death. When he stopped coughing and grew still, I knew it was the beginning of the end. The enormous debt we ran up marked the beginning of the end as far as our standard of living was concerned.

Beginning of the end - Idioms by The Free Dictionary

Beginning of the End is a 1957 independently made American black-and-white science fiction giant insects film, produced and directed by Bert I. Gordon. It stars Peter Graves, Peggie Castle, and Morris Ankrum. The film's storyline concerns an agricultural scientist (Graves) who has successfully grown gigantic vegetables using radiation.

Beginning of the End (film) - Wikipedia

Is This The Beginning Of The End? I'm going to say something that I don't normally say; that is, I don't think the United States is going to be around a whole lot longer. I regret having come to that conclusion, but I can't ignore the fact of it.

Is This The Beginning Of The End? | Survivopedia

A kind of bizarre, gruesome, hellish dystopia. The end of the world feels like now for a very good reason. A species (that's us) fighting each other desperately for life – on a dying planet. Imagine that aliens visited this planet.

Has Covid spelled the beginning of the end for purpose ...

This may not be the end, but it may be the beginning of the end for the poppy. Covid-19 restrictions have made them increasingly difficult to find.

How do you start over after the end of the world? "Not just an apocalyptic thriller, but also a timely reminder of what is most important in life--family, love, and hope." --Peng Shepherd, author of The Book of M Six years after a global pandemic wiped out most of the planet's population, the survivors are rebuilding the country, split between self-governing cities, hippie communes and wasteland gangs.In postapocalyptic San Francisco, former pop star Moira has created a new identity to finally escape her past--until her domineering father launches a sweeping public search to track her down. Desperate for a fresh start herself, jaded event planner Krista navigates the world on behalf of those too traumatized to go outside, determined to help everyone move on--even if they don't want to. Rob survived the catastrophe with his daughter, Sunny, but lost his wife. When strict government rules threaten to separate parent and child, Rob needs to prove himself worthy in the city's eyes by connecting with people again.Krista, Moira, Rob and Sunny are brought together by circumstance, and their lives begin to twine together. But when reports of another outbreak throw the fragile society into panic, the friends are forced to finally face everything that came before--and everything they still stand to lose. Because sometimes having one person is enough to keep the world going.

John Hill and Marvino Buck sit in a prison cell, watching the world fall apart on the news. Janay Williamson, a guard at the Cook County Jail, finds herself surrounded by violent men when civilization begins to crumble. Henry Haynes is a doctor in the middle of his shift when he notices the hospital is eerily silent. None of them knew the world would end that day. Now that it has, they all will have to fight to stay alive. With the world collapsing all around them, death seems imminent. Surviving quickly becomes all that there is. The only thing separating life from death is who wants it more. Who has the strongest will to survive? All seems lost at the beginning of the end . . .

Asserts the human species is at a low level in the evolutionary chain and that the human brain grew larger than its physical skull could accomodate, causing damage which resulted in the species' alienation from the immaterial world.

In this fascinating journey to the edge of science, Vidal takes on big philosophical questions: Does our universe have a beginning and an end or is it cyclic? Are we alone in the universe? What is the role of intelligent life, if any, in cosmic evolution? Grounded in science and committed to philosophical rigor, this book presents an evolutionary worldview where the rise of intelligent life is not an accident, but may well be the key to unlocking the universe's deepest mysteries. Vidal shows how the fine-tuning controversy can be advanced with computer simulations. He also explores whether natural or artificial selection could hold on a cosmic scale. In perhaps his boldest hypothesis, he argues that signs of advanced extraterrestrial civilizations are already present in our astrophysical data. His conclusions invite us to see the meaning of life, evolution and intelligence from a novel cosmological framework that should stir debate for years to come.

First published in 1956, this is a powerful portrayal of a middle-class Egyptian family confronted by material, moral, and spiritual problems during World War II.

A caterpillar introduces the concept that each ending is the beginning of something else, as when the end of a day marks the beginning of night.

First published in Germany in 1929, The End and the Beginning is a lively personal memoir of a vanished world and of a rebellious, high-spirited young woman's struggle to achieve independence. Born in 1883 into a distinguished and wealthy aristocratic family of the old Austro-Hungarian Empire, Hermynia Zur Muhlen spent much of her childhood travelling in Europe and North Africa with her diplomat father. After five years on her German husband's estate in czarist Russia she broke with both her family and her husband and set out on a precarious career as a professional writer committed to socialism. Besides translating many leading contemporary authors, notably Upton Sinclair, into German, she herself published an impressive number of politically engaged novels, detective stories, short stories, and children's fairy tales. Because of her outspoken opposition to National Socialism, she had to flee her native Austria in 1938 and seek refuge in England, where she died, virtually penniless, in 1951. This revised and corrected translation of Zur Muhlen's memoir - with extensive notes and an essay on the author by Lionel Gossman - will appeal especially to readers interested in women's history, the Central European aristocratic world that came to an end with the First World War, and the culture and politics of the late nineteenth and early twentieth centuries.

I had to accept that I wasn't just Arthur Leywin anymore, and that I could no longer be limited by the circumstances of my birth. If I was going to escape, if I was going to go toe-to-toe with the most powerful beings in this world, I needed to push myself to my utmost limit...and then I needed to push even further. After nearly dying as a victim of his own strength, Arthur Leywin wakes to find himself far from the continent where he was born for the second time. Alone, broken, and with no way to tell his family he's alive, Arthur must rebuild his strength to survive. As he ascends through an ancient dungeon filled with hostile beasts and devious trials, he discovers an ancient, absolute power - a power that will either ruin him or take him to new heights. But the dungeon won't give up its knowledge easily. Before he can plunder its depths, Arthur must learn to untangle the threads of fate. He must band together with the unlikelyest of allies if he hopes to escape with his life.

'Prepare to have your mind blown! A brilliantly written overview of the past, present and future of modern cosmology.' - DALLAS CAMPBELL, author of Ad Astra The Beginning and the End of Everything is the whole story as we currently understand it - from nothing, to the birth of our universe, to its ultimate fate. Authoritative and engaging, Paul Parsons takes us on a rollercoaster ride through billions of light years to tell the story of the Big Bang, from birth to death. 13.8 billion years ago, something incredible happened. Matter, energy, space and time all suddenly burst into existence in a cataclysmic event that's come to be known as the Big Bang. It was the birth of our universe. What started life smaller than the tiniest subatomic particle is now unimaginably vast and plays home to trillions of galaxies. The formulation of the Big Bang theory is a story that combines some of the most far-reaching concepts in fundamental physics with equally profound observations of the cosmos. From our realization that we are on a planet orbiting a star in one of many galaxies, to the discovery that our universe is expanding, to the groundbreaking theories of Einstein that laid the groundwork for the Big Bang cosmology of today - as each new discovery deepens our understanding of the origins of our universe, a clearer picture is forming of how it will all end. Will we ultimately burn out or fade away? Could the end simply signal a new beginning, as the universe rebounds into a fresh expanding phase? And was our Big Bang just one of many, making our cosmos only a small part of a sprawling multiverse of parallel universes?

This book was conceived to help individuals get to the true self, which is the inner self.
