Ada grew up during the early 19th century, when Romanticism resisted the rising influence of the Machine Age. This conflict was symbolic of her personal life. Restrained by a mother hoping to curtail any behavior resembling that of an amoral father, Ada was force-fed science and mathematics.

""[A] colorful cast of luminaries and rogues . . . This biography provides an intriguing glimpse into the beginnings of computer science and a reminder that character is destiny."--"Wall Street Journal Known in her day as an "enchantress of numbers," Ada Byron, Lady Lovelace, daughter of the poet Lord Byron, was one of the most fascinating women of the 19th century. In collaboration with Charles Babbage, inventor of the mechanical "thinking machine" that anticipated by more than a century the invention of the computer, Ada devised a method of using punch cards to calculate Bernoulli numbers and thus became the mother of computer programming. It was in her honor that, in 1980, the U.S. Department of Defense named its computer language "Ada." In this critically acclaimed biography, Benjamin Woolley, author of "The Queen's Conjuror, portrays Ada Byron's life as the embodiment of the schism between the worlds of romanticism and scientific rationalism. He describes how Ada's efforts to bridge these opposites with a "poetical science" was the driving force behind one of the most remarkable careers of the Victorian Age.

identity of another Earth woman who's supposed to marry a Tarrkuan. Can she pull off the switch without her new alien husband learning of her deceit? After years spent in the asteroid mines, Varro returns to his home planet only to discover his betrothed has married another. Angry and hurt, he vows to never trust another female again, though he knows he must fulfill his duties to his people and procreate as soon as possible. Now he must take the human bride who's offered to him--a stranger from Earth, no less. But warmth fills him the moment he first glimpses his little bride, and her sweet demeanor soon wins him over. Perhaps an arranged marriage to a human is what the Gods had intended for him all along. Once Julie and Varro are married, he takes her home and claims her thoroughly, leaving no doubt in her mind that she now belongs to him. He also informs her that he's more than her husband--he's also her master--and she's expected to obey his every command. When she's naughty, he doesn't hesitate to apply a sturdy leather strap to her bottom. But he also possesses a gentler side and she can't help falling for the strict but loving alien. She also can't help but shudder in ecstasy as he claims her roughly, time and time again, leaving her breathless and trembling for his masterful touch. But all lies eventually unravel. What will Varro do when he learns of her deceit?

"Let other people volunteer to be brides and join the alien sausage party," says mom with a deep frown. "Okay, first of all, please don't ever use the term 'sausage party' again. And secondly, Mom, my mind is made up. This might be our only chance. I will convince them to cure her. And I will be on a spaceship -- with aliens!" responds Maya. Maya Arnold was leading a normal life, working and helping care for her sister, until the Cerasteans arrived. Offering a cure for cancer if enough women volunteer as brides, Maya jumped at the chance. Saving her sister was her only goal. She never expected to actually fall in love with an alien, or find best friends in the other bride volunteers. Since the mysterious

destruction of Ceraste, Commander D'Avii and the surviving males have been searching the galaxy for a new home. Finding Earth and its women was a miracle. Like most Cerasteans, he finds humans to be fascinating creatures -- none more so than bride volunteer Maya. His attraction to her is instant and intense. Still he knows Maya can never choose him, a warrior, with so many higher-caste scientists seeking their own mates. To do so would shame the scientists and tear the last of his people apart. Yet he aches at the loss of something he never even had.

There are a million ways to end up in the Alien Bride Lottery. But all it takes is one. Every unmarried female human over the age of twenty-one gets entered once a year. You can also accept extra entries for legal infractions--instead of paying a parking fine, for example, you can request an extra entry. Lots of women do that. I mean, why not? The chances are astronomical that your name will get chosen to be one of the hundred or so women who get shipped off to space every year. And even if your name is drawn, the odds are slim that you'll match up with an alien who's looking for a mate. Most of the lottery-drawn women come back to Earth every year and resume their lives as if nothing changed. But some don't. And no matter what, getting drawn in the Lottery means you have to compete in the Bride Games. Guess that's where I'm heading now. I

I guess you could say I was a damsel in distress, and he was my knight in shining armor. But more accurately, I was a girl with a lot of bad luck, and he was a guy with a lot of muscles and tattoos. Jude "Lucky" Locketti wasn't just a sexy, brooding construction worker. He was my own personal hero who seemed to be in all the right places at the right times. Like when my car broke down and I needed a ride home, and when I face planted on the sidewalk right in front of him and had to be taken to the emergency room. Those weren't exactly my best moments, but they were his. We became friends, and it didn't matter that he was sixteen years older than me. We had a lot in common-like our love of old rock music and vintage fast cars, and our aversion to relationships. When he approached me with a crazy idea to help me out, I couldn't say no. The arrangement was supposed to be temporary. A marriage on paper and nothing else. It should've been easy, but it wasn't. Because here I am, eighteen years-old, still in high school, and married to a man I was never supposed to fall in love with. We had just one rule-no kissing the bride. But we broke that rule, and it sealed our fate forever.
