This book explores the contradictions that emerge in international statebuilding efforts in war-torn societies. Since the end of the Cold War, more than 20 major peace operations have been deployed to countries emerging from internal conflicts. This book argues that international efforts to construct effective, legitimate governmental structures in these countries are necessary but fraught with contradictions and vexing dilemmas.. Drawing on the latest scholarly research on postwar peace operations, the volume addresses cutting-edge issues of statebuilding including coordination, local ownership, security, elections, constitution making, and delivery of development aid features contributions by leading and up-and-coming scholars provides empirical case studies including Afghanistan, Cambodia, Croatia, Kosovo, Liberia, Sierra Leone, South Africa, and others presents policy-relevant findings of use to students and policymakers alike The Dilemmas of Statebuilding will be vital reading for students and scholars of international relations and political science. Bringing new insights to security studies, international development, and peace and conflict research, it will also interest a range of policy makers.

After civil wars end, what can sustain peace in the long-term? In particular, how can outsiders facilitate durable conflict-managing institutions through statebuilding - a process that historically has been the outcome of bloody struggles to establish the state's authority over warlords, traditional authorities, and lawless territories? In this book, Timothy Sisk explores international efforts to help the world's most fragile post-civil war countries today build viable states that can provide for security and deliver the basic services essential for development. Tracing the historical roots of statebuilding to the present day, he demonstrates how the United Nations, leading powers, and well-meaning donors have engaged in statebuilding as a strategic approach to peacebuilding after war. Their efforts are informed by three key objectives: to enhance security by preventing war recurrence and fostering community and human security; to promote development through state provision of essential services such as water, sanitation, and education; to enhance human rights and democracy, reflecting the liberal international order that reaffirms the principles of democracy and human rights. . Improving governance, alongside the state's ability to integrate social differences and manage conflicts over resources, identity, and national priorities, is essential for long-term peace. Whether the global statebuilding enterprise can succeed in creating a world of peaceful, well-governed, development-focused states is unclear. But the book concludes with a road map toward a better global regime to enable peacebuilding and development-oriented statebuilding into the 21st century.

This concise and accessible new text offers original and insightful analysis of the policy paradigm informing international statebuilding interventions. The book covers the theoretical frameworks and practices of international statebuilding, the debates they have triggered, and the way that international statebuilding has developed in the post-Cold War era. Spanning a broad remit of policy practices from post-conflict peacebuilding to sustainable development and EU enlargement, Chandler draws out how these policies have been cohered around the problematization of autonomy or self-government. Rather than promoting democracy on the basis of the universal capacity of people for self-rule, international statebuilding assumes that people lack capacity to make their own judgements safely and therefore that democracy requires external intervention and the building of civil society and state institutional capacity. Chandler argues that this policy framework inverts traditional liberal-democratic understandings of autonomy and freedom - privileging governance over government - and that the dominance of this policy perspective is a cause of concern for those who live in states involved in statebuilding as much as for those who are subject to these new regulatory frameworks. Encouraging readers to reflect upon the changing understanding of both state-society relations and of the international sphere itself, this work will be of great interest to all scholars of international relations, international security and development.

Moving beyond the binary argument between those who buy into the aims of creating liberal democratic states grounded in free markets and rule of law, and those who critique and oppose them, this timely and much-needed critical volume takes a fresh look at the liberal peace debate. In doing so, it examines the validity of this critique in contemporary peacebuilding and statebuilding practice through a multitude of case studies - from Afghanistan to Somalia, Sri Lanka to Kosovo. Going further, it investigates the underlying theoretical assumptions of liberal peacebuilding and statebuilding, as well as providing new theoretical propositions for understanding current interventions. Written by some of the most prominent scholars in the field, alongside several new scholars making cutting edge contributions, this is an essential contribution to a rapidly growing interdisciplinary area of study.

U.S. Government Counterterrorism: A Guide to Who Does What is the first readily available, unclassified guide to the many U.S. government agencies, bureau offices, and programs involved in all aspects of countering terrorism domestically and overseas. The authors, veterans of the U.S. government's counterterrorism efforts, present a rare insider's view of the counterterrorism effort, addressing such topics as government training initiatives, weapons of mass destruction, interagency coordination, research and development, and the congressional role in policy and budget issues. Includes a Foreword by Brian Michael Jenkins, Senior Advisor RAND Corporation Individual chapters describe the various agencies, their bureaus, and offices that develop and implement the counterterrorism policies and programs, providing a useful unclassified guide to government officials at all levels as well as students and others interested in how the U.S. counters terrorism. The book also discusses the challenges involved in coordinating the counterterrorism efforts at federal, state, and local levels and explains how key terror events influenced the development of programs, agencies, and counterterrorism legislation. The legislative underpinnings and tools of the U.S. counterterrorism efforts are covered as are the oft-debated issues of defining terrorism itself and efforts to counter violent extremism. In addition to outlining the specific agencies and programs, the authors provide unique insights into the broader context of counterterrorism efforts and developments in the last 10-plus years since 9/11 and they raise future considerations given recent landscape-altering global events. The authors were interviewed by National Defense Magazine in a January 23, 2012 article entitled Counterterrorism 101: Navigating the Bureaucratic Maze. They were interviewed on April 30, 2012 by Federal News Radio. Michael Kraft was also interviewed on June 27, 2014 by Federal News Radio.

Some may dispute the effectiveness of aid. But few would disagree that aid delivered to the right source and in the right way can help poor and fragile countries develop. It can be a catalyst, but not a driver of development. Aid now operates in an arena with new players, such as middle-income countries, private philanthropists, and the business community: new challenges presented by fragile states, capacity development, and climate change; and new approaches, including transparency, scaling up, and South-South cooperation. The next High Level Forum on Aid Effectiveness must determine how to organize and deliver aid better in this environment. Catalyzing Development proposes ten actionable game-changers to meet these challenges based on in-depth, scholarly research. It advocates for these to be included in a Busan Global Development Compact in order to guide the work of development partners in a flexible and differentiated manner in the years ahead. Contributors: Kemal Dervis (Brookings Institution), Shunichiro Honda (JICA Research Institute), Akio Hosono (JICA Research Institute), Johannes F. Linn (Emerging Markets Forum and Brookings Institution), Ryutaro Murotani (JICA Research Institute), Jane Nelson (Harvard Kennedy School and Brookings Institution), Mai Omo (JICA Research Institute), Kang-ho Park (Ministry of Foreign Affairs and Trade, Korea), Tony Pipa (U.S. Agency for International Development), Sarah Puritz Milson (Brookings Institution), HyunJoo Rhee (Korea International Cooperation Agency), Mine Sato (JICA Research Institute), Shinichi Takeuchi (JICA Research Institute), Keiichi Tsunekawa (JICA Research Institute), Haire Woods (University College, Oxford), Sam Worthington (Interaction)

Why Nation-Building Matters establishes a framework for building security forces, economic development, and political consolidation that blends soft and hard power into a deployable and effective package.

This book offers a critical examination of 'infrastructures for peace', originally proposed as a framework of conflict transformation. Through an exploration of the statist ideological underpinnings of peace-building, it traces how the concept was transformed by institutional actors - international organisations and states - into a tool to further the state-building goals of liberal peace-building.

State Building Post-conflict related efforts by the international community towards state (re)building and reconstruction of society and economy have become a more or less regular feature of international affairs since the early 1990s. It seems that the demand for such international efforts is rather rising than diminishing. All have in common that the establishment of sound state structures and liveable economies in a given state are considered by a sizeable and powerful group of states as something that is furthering international peace and stability. The purpose of this book is to address the strategic and policy dimensions of these international state building and reconstruction efforts. The chapters take up issues relating to the economic, security-related and institutional aspects. The authors strike a balance and attempt to formulate recommendations.

The Mughals, British and Soviets all failed to subjugate Afghanistan, failures which offer valuable lessons for today. Taking a long historical perspective from 1500 to 2012, this volume examines the Mughal, British, Soviet and NATO efforts in Afghanistan, drawing on new archives and a synthesis of previous counter-insurgency experiences. Special emphasis is given to ecology, terrain and logistics to explain sub-conventional operations and state-building in Afghanistan. War and State-Building in Modern Afghanistan provides an overall synthesis of British, Russian, American and NATO military activities in Afghanistan, which directly links past experiences to the current challenges. These timely essays are particularly relevant to contemporary debates about NATO's role in Afghanistan: do the war and state-building policies currently employed by NATO forces undercut or enhance a political solution? The essays in this volume introduce new historical perspectives on this debate, and will prove illuminating reading for students and scholars interested in military history, the history of warfare, international relations and comparative politics.
