Eating sustainable seafood is about opening your mind (and fridge) to a vast array of fish and shellfish that you might not have considered before--and the Pacific Coast is blessed with an abundance of wild species. With *Lure*, readers embark on a wild Pacific adventure and discover the benefits of healthy oils and rich nutrients that seafood delivers. This stunning cookbook, authored by chef and seafood advocate Ned Bell, features simple techniques and straightforward sustainability guidelines around Pacific species as well as 80 delicious recipes to make at home. You'll find tacos, fish burgers, chowders, and sandwiches--the types of dishes that fill bellies, soothe souls and get happy dinner table conversation flowing on a weekday night--as well as elegant (albeit still simple-to-execute) dinner party options, such as crudo, ceviche, and caviar butter.

Wild animals form an integral component of the human leisure experience. They are a significant part of the leisure industry and are economically valuable entities. However, as sentient beings, animals also have rights and welfare needs, and, like humans, may also have their own leisure desires and requirements. This collection provides an in-depth analysis of the rights and welfare of humans and wild animals as the two relate to one another within the sphere of leisure studies. It examines a wide array of animals, such as wolves, elephants, dolphins and apes, in a diverse range of leisure settings in international locations, from captive wild animals in zoos, hunting, swimming with dolphins and animals used as educators and for tourist entertainment. This book provides a forum for future considerations of wild animals and leisure and a voice for animal welfarist agendas that seek to improve the conditions under which wild animals interact with and are engaged with by humans.

Updated and expanded for 2017, with new expert information on everything the modern fisherman needs to know--from picking the right gear and kitting out your boat, to the best techniques and tactics for seeking, locating, and snaring your catch. This revamped edition of the best-selling 2013 title brings readers all the information they need before they hit the water: Gear Up Find the best of what's out there, and what isn't worth the money. Including lures, baits, flies and tackle for any situation in any style of water. Hit the Water From streams and ponds to big lakes and the open ocean, get all the info and field-tested strategies you need be successful where you're fishing Hook a Prize The experts at Field and Stream and professional fishing guides around the country lay out the do's and don't's, where those sneaky fish are hiding, and how to put yourself in best position for the catch and much more. Whether Bobber fishing with newbies or looking to reel in a prize white marlin in the open ocean these are the tricks, tips and techniques to get the job done. This book also highlights some of the author's favorite fishing spots as well as some dream destinations. For amateur fisherman of all skill levels, this is a must-have book.

The works collected in *The Lure of Authoritarianism* consider the normative appeal of authoritarianism in light of the 2011 popular uprisings in the Middle East. Despite what seemed to be a popular revolution in favor of more democratic politics, there has instead been a slide back toward authoritarian regimes that merely gesture toward notions of democracy. In the chaos that followed the Arab Spring, societies were lured by the prospect of strong leaders with firm guiding hands. The shift toward normalizing these regimes seems sudden, but the works collected in this volume document a gradual shift toward support for authoritarianism over democracy that stretches back decades in North Africa. Contributors consider the ideological, socioeconomic, and security-based justifications of authoritarianism as well as the surprising and vigorous reestablishment of authoritarianism in these regions. With careful attention to local variations and differences in political strategies, the volume provides a nuanced and sweeping consideration of the changes in the Middle East in the past and what they mean for the future.

Deep in the Finger Lakes Region of New York. Lives a boy who shares the love of fishing with his grandfather. Who receives a gift of a fishing lure for his birthday. His enjoyment of his new gift is cut short. With a twist of faith, his grandfather's love for fishing is renewed in one single moment that changes everything. twenty-four teams of leading scientists and managers. Promotes transparent justification for fishing and hunting regulations. Provides examples for integrating decision making into management. Emphasizes creativity in management by integrating art and science. This book appeals to population biologists, evolutionary biologists and social scientists. It is a key resource for on-the-ground managers and research scientists developing harvesting applications. As the book's contributors explain: "Making decisions that are robust to uncertainty...is a paradigm shift with a lot of potential to improve outcomes for fish and wildlife populations." -Andrew Tyre and Brigitte Tenhumberg "Temporal shifts in system states...must somehow be anticipated and dealt with to derive harvest policies that remain optimal in the long term." -Michael Conroy "Proactive, effective management of sportspersons...will be essential in the new paradigm of harvest management." -Matthew Gruntorad and Christopher Chizinski

This book investigates how fish experience their lives, their amazing senses and abilities, and how human actions impact their quality of life. The authors examine the concept of fish welfare and the scientific knowledge behind the inclusion of fish within the moral circle, and how this knowledge can change the way we treat fish in the future. In many countries fish are already protected by animal welfare legislation in the same way as mammals, but in practice there is still a major gap between how we ethically view these groups and how we actually treat them. The poor treatment of fish represents a massive animal welfare problem in aquaculture and fisheries, both in terms of the number of animals affected and the severity of the welfare issues. Thanks to its interdisciplinary scope, this thought-provoking book appeals to professionals, academics and students in the fields of animal welfare, cognition and physiology, as well as fisheries and aquaculture management.

Progressing from simple implements of bone, stone, and wood to metals to the elaborately feathered flies of the Victorian era, antique fishing lures are now sought as highly prized collectibles. This edition has hundreds of new photographs and much new information not included in the first edition. Chapters include the 'big ten' companies, miscellaneous companies, metal lures, handmade lures, and finally the seldom seen experimental lures. Concerned primarily with the most collectible antique fishing lures made before 1940, this deluxe hardbound book contains well over 1,300 lures beautifully reproduced in full color. Research and identification will be simple yet effective with these descriptions, sizes, dates, 2001 values, and quick comparisons of similar features of lures... AUTHORBIO: Dudley Murphy decided to become a lifelong collector of fishing lures at the age of 13, when his grandfather presented him with a gift of old Heddon, Jamison, and Clark lures. As one of the three founders of the National Fishing Lure Collector's Club, Dudley is an active collector with a variety of interest, including fishing.

AUTHORBIO: Rick Edmisten was introduced to fishing at age 12 by his father, and by the time he was 18

had developed a keen interest in collecting old lures and tackle. He has hosted a successful fishing tackle collectible show from 1990 to the present, and is recognized as an authority on old tackle. He often appraises estates and collections. REVIEW: This book focuses on the "big ten" companies, metal lures, handmade lures, and the seldom seen experimental lures, and emphasizes antique lures made before 1940. Each section begins with a short introduction about the company, followed by vivid, representative color photographs that the company made. Each photo lists the name of the lure, number, date manufactured, length, collector value, and any important notes or details about the lure.
