Ethanol's role in the future
of heavy duty transportation

At heart, transportation policy and research are about people: connecting individuals and the places they live, ensuring sufficient and equitable access, and facilitating movement. Whether at the regional, city, or neighborhood scale, the loss of population presents unique challenges where transport is concerned. It is not only about preservation of existing access, but possibly even a

Chain with the form of transportation. Specifically it seeks to uncover the factors accounting for the level of customer satisfaction in transportation of products. The study reviewed major theoretical area to develop a framework which suggests that customer satisfaction in Distribution Company would be a function of service quality and customer orientation of service employees. The data from the study constituted employees and customers of 35 people and was analyzed through a descriptive statistics. The study reveals that the mode of transportation does not

Read Book The Role Of Transportation In Logistics

Chain always achieve smooth delivery and satisfaction desired but adds value to the mode of transport. It also shows that delivery times to customers are not always meet. Most customers also agree that increase in customer satisfaction also depends on transportation. Furthermore, it is recommended on the basis of the evidence that to understand customer satisfaction better, the company must survey customers about both perceived service quality and the perception about satisfaction.
