The space in between birth and death is life. The space in between knowing and believing is something. I like the word mezzanine but I am not sure if it fits since by definition it relates to architecture. Interspace, on the other hand, sounds like something related to science fiction. Period is about time.

In writing, a space () is a blank area that separates words, sentences, syllables and other written or printed glyphs. Conventions for spacing vary among languages, and in some languages the spacing rules are complex. Typesetting uses spaces of varying length for specific purposes. The typewriter, on the other hand, can accommodate only a limited number of keys. Most typewriters have only one width of space, obtained by pressing the space bar. Following widespread acceptance of the typewriter,

"A girl-centered *Catcher in the Rye* for the 21st century."—Kirkus Reviews, starred review Two outcast best friends are desperate to survive senior year and break away from their dying factory town in Stacia Tolman's *The Spaces Between Us*, an unforgettable YA debut. Serena Velasco and her best (and only) friend, Melody Grimshaw, are dying to get out of Colchis. Until now they've both been coasting, keeping a safe distance from the bleakness of home and the banality of high school. To make things more interesting Serena fixates on communism, eager to get a rise out of their conservative small town. Her Western Civ teacher catches on and challenges her with an independent study of class and upward mobility—what creates the spaces between us. Meanwhile, Grimshaw takes on a mission of her own: to make it onto the cheerleading squad, find a job, and escape the weight of her family's hopeless reputation. But sometimes the biggest obstacles are the ones you don't see coming; Grimshaw's quest for success becomes a fight for survival, and Serena's independent study gets a little too real. With the future of their friendship and their lives on the line, the stakes have never been so high. Christy Ottaviano Books

- A. A. Gill Caroline Jones was born in Ethiopia and spent most of her childhood in East Africa. She read French and Spanish at Oxford University and went on to make documentaries for the BBC. Now aged 39, she is happily married with two children. Yet beneath this seemingly perfect public exterior, Caroline was in fact privately indulging in a pattern of destructive behaviour that left her exhausted, anxious, depressed and full of self-loathing - from the ages of 17 to 31, for 14 years, Caroline was suffering from an extremely widespread yet comparatively little-talked about mental illness - bulimia. Caroline is articulate, intelligent, insightful and frank about her experiences, interweaving the journey of her illness with memories of her African childhood, her time at Oxford, her work for the BBC, her family and other relationships, making for a warm and engaging memoir. Her perceptive, retrospective approach to her illness allows her to transcend the topic of bulimia and talk more generally about self-destructive behaviour - there are lessons here which will speak to a little part of everyone.

The quality of life of millions of people living in cities could be improved if the form of the city were to evolve in a manner appropriate to its climatic context. Climatically responsive urban design is vital to any notion of sustainability: it enables individual

buildings to make use of renewable energy sources for passive heating and cooling, it enhances pedestrian comfort and activity in outdoor spaces, and it may even encourage city dwellers to moderate their dependence on private vehicles. Urban Microclimate bridges the gap between climatology research and applied urban design. It provides architects and urban design professionals with an understanding of how the structure of the built environment at all scales affects microclimatic conditions in the space between buildings, and analyzes the interaction between microclimate and each of the elements of the urban landscape. In the first two sections of the book, the extensive body of work on this subject by climatologists and geographers is presented in the language of architecture and planning professionals. The third section follows each step in the design process, and in part four a critical analysis of selected case study projects provides a demonstration of the complexity of applied urban design. Practitioners will find in this book a useful guide to consult, as they address these key environmental issues in their own work.

productions that evoke emotional as well as intellectual responses, and even flayed lambs and beef kidneys. Lacy has experimented with ways to claim the power of mass media, to use women's consciousness-raising groups as a performance structure, and to connect her projects to lived experiences. The body and large groups of bodies are the locations for her lifelike art, revealing the aesthetics of relationships among people. In this critical examination of Suzanne Lacy, Sharon Irish surveys Lacy's art from 1972 to the present, demonstrating the pivotal roles that Lacy has had in public art, feminist theory, and community organizing. Lacy initially used her own body—or animal organs—to visually depict psychological states or social conditions in photographs, collages, and installations. In the late 1970s she turned to organizing large groups of people into art events—including her most famous work, *The Crystal Quilt*, a 1987 performance broadcast live on PBS and featuring hundreds of women in Minneapolis—and pioneered a new genre of public art. Irish investigates the spaces between art and life, self and other, and the body and physical structures in Lacy's multifaceted artistic projects, showing how throughout her influential career Lacy has created art that resists racism, promotes feminism, and explores challenging human relationships.
