Presents information about the people, places, birds, insects, flowers, and endangered species associated with each of the fifty states and the nation's capital.

Since its original landmark publication in 1980, *A People's History of the United States* has been chronicling American history from the bottom up, throwing out the official version of history taught in schools -- with its emphasis on great men in high places -- to focus on the street, the home, and the workplace. Known for its lively, clear prose as well as its scholarly research, *A People's History* is the only volume to tell America's story from the point of view of -- and in the words of -- America's women, factory workers, African-Americans, Native Americans, the working poor, and immigrant laborers. As historian Howard Zinn shows, many of our country's greatest battles -- the fights for a fair wage, an eight-hour workday, child-labor laws, health and safety standards, universal suffrage, women's rights, racial equality -- were carried out at the grassroots level, against bloody resistance. Covering Christopher Columbus's arrival through President Clinton's first term, *A People's History of the United States*, which was nominated for the American Book Award in 1981, features insightful analysis of the most important events in our history. Revised, updated, and featuring a new afterword by the author, this special twentieth anniversary edition continues Zinn's important contribution to a complete and balanced understanding of American history.

The 50 States plus Washington DC that make up the USA all play their own unique part in the history and character of the nation. This book is an educational guide that teaches young readers about America's rich and varied history, geography and culture, and the people and places that stand out.

"As James Madison led America's effort to write its Constitution, he made two great inventions--the separation of powers and federalism. The first is more famous, but the second was most essential because, without federalism, there could have been no United States of America. Federalism has always been about setting the balance of power between the federal government and the states--and that's revolved around deciding just how much inequality the country was prepared to accept in exchange for making peace among often-warring states. Through the course of its history, the country has moved through a series of phases, some of which put more power into the hands of the federal government, and some rested more power in the states. Sometimes this rebalancing led to armed conflict. The Civil War, of course, almost split the nation permanently apart. And sometimes it led to political battles. By the end of the 1960s, however, the country seemed to have settled into a quiet agreement that inequality was a prime national concern, that the federal government had the responsibility for addressing it through its own policies, and that the states would serve as administrative agents of that policy. But as that agreement seemed set, federalism drifted from national debate, just as the states began using their administrative role to push in very different directions. The result has been a rising tide of inequality, with the great invention that helped create the nation increasingly driving it apart"--

Unassuming but formidable, American maritime insurers used their position at the pinnacle of global trade to shape the new nation. The

international information they gathered and the capital they generated enabled them to play central roles in state building and economic development. During the Revolution, they helped the U.S. negotiate foreign loans, sell state debts, and establish a single national bank. Afterward, they increased their influence by lending money to the federal government and to its citizens. Even as federal and state governments began to encroach on their domain, maritime insurers adapted, preserving their autonomy and authority through extensive involvement in the formation of commercial law. Leveraging their claims to unmatched expertise, they operated free from government interference while simultaneously embedding themselves into the nation's institutional fabric. By the early nineteenth century, insurers were no longer just risk assessors. They were nation builders and market makers. Deeply and imaginatively researched, *Underwriters of the United States* uses marine insurers to reveal a startlingly original story of risk, money, and power in the founding era.

Born out of violence and the aspirations of its early settlers, the United States of America has become one of the world's most powerful nations. The book begins in colonial America as the first Europeans arrived, lured by the promise of financial profit, driven by religious piety and accompanied by diseases which would ravage the native populations. It explores the tensions inherent in a country built on slave labour in the name of liberty, one forced to assert its unity and reassess its ideals in the face of secession and civil war, and one that struggled to establish moral supremacy, military security and economic stability during the financial crises and global conflicts of the twentieth century. Woven through this richly crafted study of America's shifting social and political landscapes are the multiple voices of the nation's history: slaves and slave owners, revolutionaries and reformers, soldiers and statesmen, immigrants and refugees. These voices help define the United States at the dawn of a new century.

This book is a collection of essays written over several years. Professor Sulayman S. Nyang has collected them to share with the reading public his insights and research findings on the emerging Muslim community in the United States of America. Working on the assumption that American Muslims are still unknown to most Americans, the author addresses several issues which are relevant to the whole discussion of religious plurality and multiculturalism in American society. Its contents range from Islam and the American Dream to the birth and development of the Muslim press in the United States. -- Publisher description.
