When it was originally released, Thriving in Transitions: A Research-Based Approach to College Student Success represented a paradigm shift in the student success literature, moving the student success conversation beyond college completion to focus on student characteristics that promote high levels of academic, interpersonal, and intrapersonal performance in the college environment. The authors contend that a focus on remediating student characteristics or merely encouraging specific behaviors is inadequate to promote success in college and beyond. Drawing on research on college student thriving completed since 2012, the newly revised collection presents six research studies describing the characteristics that predict thriving in different groups of college students, including first-year students, transfer students, high-risk students, students of color, sophomores, and seniors, and offers recommendations for helping students thrive in college and life. New to this edition is a chapter focused on the role of faculty in supporting college student thriving.

Going to college can be exciting, anxiety inducing, and expensive! You want your child to get the most out of their college experience—what advice do you give? Thriving at College by Alex Chediak is the perfect gift for a college student or a soon-to-be college student. Filled with wisdom and practical advice from a seasoned college professor and student mentor, Thriving at College covers the ten most common mistakes that college students make—and how to avoid them! Alex leaves no stone unturned—he discusses everything from choosing a major and discerning one’s vocation to balancing academics and fun, from cultivating relationships with peers and professors to helping students figure out what to do with their summers. Most importantly, this book will help students not only keep their faith but build a vibrant faith and become the person God created them to be.
