Jeannette Ng’s debut novel *Under the Pendulum Sun* starts like many good fairy stories do: with a journey. In the mid-19th century, Catherine Helstone spends six weeks on a ship off the north English coast trying to get well and truly lost, for this is the only way to find the Faelands of Acadia. She’s trying to reach her brother Laon, a missionary for the Anglican church, who went to Acadia to replace Reverend Roche, the first missionary to the fae, who died under mysterious circumstances.

spills the chronicle of a race of people at once more than human yet kin to beasts, ruled by instincts and desires blood-deep and ages-old. The tale features a rough wanderer in seventeenth-century Mughal India who finds himself irrevocably drawn to a defiant woman—and destined to be torn asunder by two clashing worlds. With every passing chapter of beauty and brutality, Alok's interest in the stranger grows and evolves into something darker and more urgent. Political exiles are desperate to escape from the impossible city that imprisons them, in this bloody and brilliant epic fantasy. Thousands of years ago, the city of Athanor was set adrift in time and space by alchemists, called "the Curious Men". Ever since, it has accumulated cultures, citizens and species into a vast, unmappable metropolis. Isten and her gang of half-starved political exiles live off petty crime and gangland warfare in Athanor's seediest alleys. Though they dream of returning home to lead a glorious revolution, Isten's downward spiral drags them into a mire of addiction and violence. Isten must find a way to save the exiles and herself if they are ever to build a better, fairer world for the people of their distant homeland. Medicine, where he develops an unconventional hypothesis: What if the world's most celebrated mythological beasts—mermaids, minotaurs, and satyrs—were in fact the evolutionary ancestors of humankind? The Resurrectionist offers two extraordinary books in one. The first is a fictional biography of Dr. Spencer Black, from a childhood spent exhuming corpses through his medical training, his travels with carnivals, and the mysterious disappearance at the end of his life. The second book is Black's magnum opus: The Codex Extinct Animalia, a Gray's Anatomy for mythological beasts—dragons, centaurs, Pegasus, Cerberus—all rendered in meticulously detailed anatomical illustrations. You need only look at these images to realize they are the work of a madman. The Resurrectionist tells his story.

In recognition of his labors and his filial piety, an unlikely source has sent him a dangerous gift: 250 Sardinian horses. You give a man one of the famed Sardinian horses to reward him greatly. You give him four or five to

Wisely, the gift comes with the stipulation that Tai must claim the horses in person. Otherwise he would probably be dead already...

time travel and leave only a small group of elites with the power to shape the past, present, and future. Against the vast and intricate forces of history and humanity, is it possible for a single person's actions to echo throughout the timeline? Praise for *The Future of Another Timeline*: "An intelligent, gut-wrenching glimpse of how tiny actions, both courageous and venal, can have large consequences. Politics, manners, humor, sexuality, wealth, even our definitions of success are periodically renegotiated based on the new values society chooses to use as a lens to judge what is acceptable. Are these new values randomly chosen or is there a pattern? *Pendulum* chronicles the stuttering history of western society; that endless back-and-forth swing between one excess and another, always reminded of what we left behind. There is a pattern and it is 40 years: 2003 was a fulcrum year, as was 1963, its opposite. *Pendulum* explains where we have been as a society, how we got here, and where we are headed. If you would benefit from a peek into the future, you would do well to read this

Bored with their work, three Milanese editors cook up "the Plan," a hoax that connects the medieval Knights Templar with other occult groups from ancient to modern times. This produces a map indicating the geographical point from which all the powers of the earth can be controlled—a point located in Paris, France, at Foucault's Pendulum. But in a fateful turn the joke becomes all too real, and when occult groups, including Satanists, get wind of the Plan, they go so far as to kill one of the editors in their quest to gain control of the earth. Orchestrating these and other diverse characters into his multilayered semiotic adventure, Eco has created a superb cerebral entertainment.
