a new and exciting way to solve all kinds of problems-from the boardroom to the sales floor to the cubicle jungle.

An original workbook companion to the acclaimed business bestseller *The Back of the Napkin* Dan Roam's *The Back of the Napkin*, a *BusinessWeek* bestseller, taught readers the power of brainstorming and communicating with pictures. It presented a new and exciting way to solve all kinds of problems-from the boardroom to the sales floor to the cubicle jungle. The companion workbook, *Unfolding the Napkin*, helps readers put Roam's principles into practice with step-by-step guidelines. It's filled with detailed case studies, guided do-it-yourself exercises, and plenty of blank space for drawing. Roam structured the book as a complete four-day visual-thinking seminar, taking readers step-by-step from "I can't draw" to "Here is the picture I drew that I think will save the world." The workbook teaches readers how to:

- Improve their three "built-in" visual problem solving tools.
- Apply the four-step visual thinking process (look-see-imagine-show) in any business situation.
- Instantly improve their visual imaginations.
- Learn how to recognize the type of problem to choose the best visual solution.

If *The Back of the Napkin* was a guide to fine dining, *Unfolding the Napkin* is the cookbook that will soon be heavily marked up and dogeared.

An expanded guide to enhancing analytical skills by building up one's intrinsic abilities is a primer for business leaders on how to develop ideas and enable faster results using to-the-point visual methods. Original.

The expanding application of Concept Mapping includes its role in knowledge elicitation, institutional memory preservation, and ideation. With the advent of the CmapTools knowledge modeling software kit, Concept Mapping is being applied with increased frequency and success to address a variety of problems in the workplace. Supported by business application case studies, *Applied Concept Mapping: Capturing, Analyzing, and Organizing Knowledge* offers an accessible introduction to the theory, methods, and application of Concept Mapping in business and government. The case studies illustrate applications across a range of industries—including engineering, product development, defense, and healthcare. The authors provide access to a free download of CmapTools, courtesy of the Institute for Human and Machine Cognition, to enable readers to create and share their own Concept Maps. Offering examples from the United States, Canada, Australia, Spain, Brazil, Scotland, and The Netherlands, they highlight a global perspective of this dynamic tool. The text is organized into three sections: *Practitioners' Views*—supplies narratives, guidance, and reviews of applications from career Concept Mappers *Recent Case Studies and Results*—presents in-depth examinations of specific applications and their results *Pushing the Boundaries*—explores what's possible and where the boundary conditions lie

Applied Concept Mapping facilitates the fundamental understanding needed to harness the power of Concept Mapping to develop viable solutions to a virtually unlimited number of real-world problems.

Ever been to so many meetings that you couldn't get your work done? Ever fallen asleep during a bulletpoint presentation? Ever watched the news and ended up knowing less? Welcome to the land of Blah Blah Blah. The Problem: We talk so much that we don't think very well. Powerful as words are, we fool ourselves when we think our words alone can detect, describe, and defuse the multifaceted problems of today. They can't-and that's bad, because words have become our default thinking tool. The Solution: This book offers a way out of blah-blah-blah. It's called "Vivid Thinking." In Dan Roam's first acclaimed book, *The Back of the Napkin*, he taught readers how to solve problems and sell ideas by drawing simple pictures. Now he proves that Vivid Thinking is even more powerful. This technique combines our verbal and visual minds so that we can think and learn more quickly, teach and inspire our colleagues, and enjoy and share ideas in a whole new way. The Destination: No more blah-blah-blah. Through Vivid Thinking, we can make the most complicated subjects suddenly crystal clear. Whether trying to understand a Harvard Business School class, or what went down in the Conan versus Leno battle for late-night TV, or what Einstein thought about relativity, Vivid Thinking provides a way to clarify anything. Through dozens of guided examples, Roam proves that anyone can apply this systematic approach, from leftbrain types who hate to draw

to right-brainers who hate to write. This isn't just a book about improving communications, presentations, and ideation; it's about removing the blah-blah-blah from your life for good.

“If I tell you the truth, if I tell it with a story, and if I tell that story with pictures, I can keep you glued to your seat. Let me show you how.” For the vast majority of us, giving a presentation is an extremely difficult and nerve-wracking process, whether we’re in a one-on-one meeting, a conference room with a dozen strangers, or a lecture hall in front of thousands. But according to Dan Roam, the visual communications expert and acclaimed author of *The Back of the Napkin*, it doesn’t have to be so hard. We struggle when we forget the basic steps we learned in kindergarten: show and tell. In this short but powerful book, Roam introduces a new set of tools for making extraordinary presentations in any setting. He also draws on ideas he’s been honing for more than two decades, as an award-winning presenter who has brought his whiteboard everywhere from Fortune 500 companies to tiny startups to the White House. Even if you’re already a good speaker, you’ll learn more about understanding your audience, organizing your content, building a clear storyline, creating effective visuals, and channeling your fear into fun. And you’ll master three fundamental rules:

- When we tell the truth, we connect with our audience, we become passionate, and we find self-confidence.
- When we tell a story, we make complex concepts clear, we make ideas unforgettable, and we include everyone.
- When we use pictures, people see

exactly what we mean, we captivate our audience's mind, and we banish boredom. From nailing the opening to leaving a lasting impression, you'll soon be able to give the performance of a lifetime . . . time after time. PLEASE NOTE: This eBook edition of SHOW AND TELL is carefully laid out to match the print book; this means it reads much better as designed pages, but you won't be able to use some features such as highlighting and annotating text.

Get ready for the ultimate crash course in communicating and solving problems through simple pictures. Thirty-two thousand years ago, your many-times-great-grandparents Oog and Aag drew pictures on the wall of a cave. They had an innate need to communicate, but no written language. So they found an easy and natural way to share their thoughts and stories. Today, after so many years when speaking and writing dominated, we're back in another highly visual age. About 90 percent of everything shared online is now visual—selfies, GIFs, smartphone videos, and more. This explosion of communication through pictures isn't a millennial-driven fad; it's as natural as those lines first drawn by Oog and Aag. Just turbo-charged by the latest technology. And yet over the past twenty years, as I've taught people from Fortune 500 CEOs to White House staffers how to harness the power of imagery, the biggest objection I've always heard is, "But I can't draw!" Trust me, you can. You don't need to be da Vinci to be an outstanding visual thinker and communicator. The most effective drawings are the simplest, and you can get good at those in three minutes. In this little book, I'll teach you how to use seven

basic shapes to explain just about anything to just about anyone. If you've read my previous books, you'll see one or two familiar tools here, along with a bunch of new tools you can start using right away. If you're new to my approach—welcome! Get ready to work smarter, communicate more clearly, and get better at whatever you do, just by picking up a pen. Get ready to draw to win.

This unusual book, containing an impressive variety of sleight of hand magic tricks, is sure to delight young and old alike and is the perfect introduction to magic of this type. Its 88 pages contain a wealth of anecdote on a variety of tricks and stunts that are guaranteed to liven up your dinner party. Thoroughly recommended reading for the budding magician. Graphic Facilitation is an innovative and wholly new application of art therapy theory and techniques to groups and organizations. Graphic Facilitation is a process in which a trained consultant, through color, symbols, and metaphors in murals, interprets and documents something as short as a keynote address or as long as an entire conference. The text provides a new and exciting avenue for art

therapists and for organizational development consultants. The authors provide a detailed explanation of Graphic Facilitation—what it is, how and why it works, ideas about how to become a trained Graphic Facilitator, and a multidisciplinary literature base and resources that aspiring Graphic Facilitators will need. The book's references and bibliography include pertinent, classic organizational development literature, essential learning for work in the area. Five case studies carefully lay out how the Graphic Facilitation process works in practice with a variety of organizational styles, models, and issues. They include visual murals and other imagery created by the Graphic Facilitator for each organizational event. These case studies clearly illustrate the value and promise of art therapy as an exciting new tool and provide a view of the impressive use of Graphic Facilitation. Written by two art therapists, this book is for art therapists who would like to develop and learn to use art therapy applications for business and organizational sectors. In this, it is an exciting new practice area for art therapists. The book will also be valuable for business coaches, human resource managers, organizational management consultants and facilitators who would like to enrich their practice with Graphic Facilitation techniques.
