Each year, for thirty years, two veteran investment advisors attended Berkshire Hathaway's Annual Shareholders Meeting. After each meeting, they chronicled Warren Buffett and Charlie Munger's best lessons from that year. This book compiles those thirty years of wisdom for the first time.

Charlie Munger, Berkshire Hathaway's visionary vice chairman and Warren Buffett's indispensable financial partner, has outperformed market indexes again and again, and he believes any investor can do the same. His notion of "elementary, worldly wisdom"—a set of interdisciplinary mental models involving economics, business, psychology, ethics, and management—allows him to keep his emotions out of his investments and avoid the common pitfalls of bad judgment. Munger's system has steered his investments for forty years and has guided generations of successful investors. This book presents the essential steps of Munger's investing strategy, condensed here for the first time from interviews, speeches, writings, and shareholder letters, and paired with commentary from fund managers, value investors, and business-case historians. Derived from Ben Graham's value-investing system, Munger's approach is straightforward enough that ordinary investors can apply it to their portfolios. This book is not simply about investing. It is about cultivating mental models for your whole life, but especially for your investments.

For the first time the complete financial history of Berkshire Hathaway is available under one cover in chronological format. Beginning at the origins of the predecessor companies in the textile industry, the reader can examine the development of the modern-day conglomerate year-by-year and decade-by-decade, watching as the struggling textile company morphs into what it has become today. This comprehensive analysis distils over 10,000 pages of research material, including Buffett's Chairman's letters, Berkshire Hathaway annual reports and SEC filings, annual meeting transcripts, subsidiary financials, and more. The analysis of each year is supplemented with Buffett's own commentary where relevant, and examines all important acquisitions, investments, and other capital allocation decisions. The appendices contain balance sheets, income statements, statements of cash flows, and key ratios dating back to the 1930s, materials brought together for the first time. The structure of the book allows the new student to follow the logic, reasoning, and capital allocation decisions made by Warren Buffett and Charlie Munger from the very beginning. Existing Berkshire shareholders and long-time observers will find new information and refreshing analysis, and a convenient reference guide to the decades of financial moves that built the modern-day respected enterprise that is Berkshire Hathaway.

The present book gives a detailed narrative of the life of Bill Gates, Chairman of Microsoft Corporation, the worldwide leader in software services and solutions that help people and business organisations realize their full potential. It is an account of his journey of life and the way he changed the times for the world by recognising the value of computer as a tool on every Office desktop and in every home. Under Bill Gates' leadership, Microsoft's mission was to continually advance and improve software technology and to make it easier, more cost-effective and more user-friendly. In addition to his love for computers and software, Bill Gates founded Corbis, a comprehensive digital archive of art and photography from public and private collections around the globe. Apart from Bill Gates' genius at computer software, he and his wife are known for their 28.8 dollar worth Bill Gates' foundation to support philanthropic initiatives in the areas of global health and learning. A must read biography for youth to derive inspiration from this living legend.

Words of wisdom from Charlie Munger—Warren Buffett's longtime business partner and the visionary Vice Chairman of Berkshire Hathaway—collected and interpreted with an eye towards investing by David Clark, coauthor of the bestselling Buffettology series. Born in Omaha, Nebraska in 1924 Charlie Munger studied mathematics at the University of Michigan, trained as a meteorologist at Cal Tech Pasadena while in the Army, and graduated magna cum laude from Harvard Law School without ever earning an undergraduate degree. Today, Munger is one of America's most successful investors, the Vice Chairman of Berkshire Hathaway, and Warren Buffett's business partner for almost forty years. Buffett says "Berkshire has been built to Charlie's blueprint. My role has been that of general contractor." Munger is an intelligent, opinionated business man whose ideas can teach professional and amateur investors how to be successful in finance and life. Like The Tao of Warren Buffett and The Tao of Te Ching, The Tao of Charlie Munger is a compendium of pithy quotes including, "Knowing what you don't know is more useful than being brilliant" and "In my whole life, I have known no wise people who didn't read all the time—none, zero." This collection, culled from interviews, speeches, and questions and answers at the Berkshire Hathaway and Wesco annual meetings, offers insights into Munger's amazing financial success and life philosophies. Described by Business Insider as "sharp in his wit and investing wisdom," Charlie Munger's investment tips, business philosophy, and rules for living are as unique as his life story; intelligent as he clearly is; and as successful as he has been.

Using the letters Warren Buffett wrote to his partners between 1956 and 1970, a veteran financial advisor presents the renowned guru's "ground rules" for investing—guidelines that remain startlingly relevant today. In the fourteen years between his time in New York with value-investing guru Benjamin Graham and his start as chairman of Berkshire Hathaway, Warren Buffett managed Buffett Partnership Limited, his first professional investing partnership. Over the course of that time—a period in which he experienced an unprecedented record of success—Buffett wrote semiannual letters to his small but growing group of partners, sharing his thoughts, approaches, and reflections. Compiled for the first time and with Buffett's permission, the letters spotlight his contrarian diversification strategy, his almost religious celebration of compounding interest, his preference for conservative rather than conventional decision making, and his goal and tactics for bettering market results by at least 10% annually. Demonstrating Buffett's intellectual rigor, they provide a framework to the craft of investing that had not existed before: Buffett built upon the quantitative contributions made by his famous teacher, Benjamin Graham, demonstrating how they could be applied and improved. Jeremy Miller reveals how these letters offer us a rare look into Buffett's mind and offer accessible lessons in control and discipline—effective in bull and bear markets alike, and in all types of investing climates—that are the bedrock of his success. Warren Buffett's Ground Rules paints a portrait of the sage as a young investor during a time when he developed the long-term value-oriented strategy that helped him build the foundation of his wealth—rules for success every investor needs today.

Charlie Munger is an American investor, businessman and philanthropist. He is vice chairman of Berkshire Hathaway, the conglomerate controlled by Warren Buffett; Buffett has described Munger as his partner. Munger served as chairman of Wesco Financial Corporation from 1984 through 2011. He is also chairman of the Daily Journal Corporation, based in Los Angeles, California, and a director of Costco Wholesale Corporation. Munger was born in Omaha, Nebraska. As a teenager he worked at Buffett & Son, a grocery store owned by Warren Buffett's grandfather. After enrolling in the University of Michigan, where he studied mathematics, he never returned to Omaha except to visit. In early 1943, a few days after his 19th birthday, he dropped out of college to serve in the U.S. Army Air Corps, where he became Second Lieutenant. He continued his studies in meteorology at Caltech in Pasadena, California, the town he was to make his home. Through the GI Bill he took a number of advanced courses through several universities; without an undergraduate degree, he entered Harvard Law School and graduated magna cum laude with a J.D. in 1948. At Harvard he was a member of the Harvard Legal Aid Bureau. In college and the Army he developed "an important skill" card playing. "What you have to learn is to fold early when the odds are against you, or if you have a big edge, back it heavily because you don't get a big edge often. Opportunity comes, but it doesn't come often, so seize it when it does come."
