via his blog, online courses, lectures, and bestselling books. He is the inventor of countless ideas that have made their way into mainstream business language, from Permission Marketing to Purple Cow to Tribes to The Dip. Now, for the first time, Godin offers the core of his marketing wisdom in one compact, accessible, timeless package. This is Marketing shows you how to do work you're proud of, whether you're a tech startup founder, a small business owner, or part of a large corporation. Great marketers don't use consumers to solve their company's problem; they use marketing to solve other people's problems. Their tactics rely on empathy, connection, and emotional labor instead of attention-stealing ads and spammy email funnels. No matter what your product or service, this book will help you reframe how it's presented to the world, in order to meaningfully connect with people who want it. Seth employs his signature blend of insight, observation, and memorable examples to teach you: * How to build trust and permission with your target market. * The art of positioning--deciding not only who it's for, but who it's not for. * Why the best way to achieve your goals is to help others become who they want to be. * Why the old approaches to advertising and branding no longer work. * The surprising role of tension in any decision to buy (or not). * How marketing is at its core about the stories we tell ourselves about our social status. You can do work that matters for people who care. This book shows you the way.

Still, the methodology of retail audit analysis is not well-known and understood to the details, even among the marketers at the client side using the data on a daily basis. The purpose of this book is to give practical guidelines to retail audit analysis, mainly from the manufacturer point of view. The book is written in a practical, real-life business style. The concise messages are aided by easy-to-follow charts, visualizing the vast variety of potential findings retail data can provide. The book also aims to summarize the market logic and dynamics that can be explored via retail audit. This is why the author purposefully created charts well explaining - among many other (brand) marketing tactics and strategies -, the ex-pocket pricing tactics, the impact of psychological price points or how a concentrated brand portfolio looks like.
