For Grossman, translation has a transcendent importance: " Translation not only plays its important traditional role as the means that allows us access to literature originally written in one of the countless languages we cannot read, but it also represents a concrete literary presence with the crucial capacity to ease and make more meaningful our relationships to those with whom we may not have had a connection before.

Why Translation Matters - Edith Grossman

Nonfiction by Edith Grossman. Why translation matters: the subject is so huge, so complex, and so dear to my heart that I have decided to begin my approach to it by answering the implicit question with another question, using the technique of query-as-response—a traditional, perhaps time-honored method of indicating the almost impenetrable difficulty of a subject, and certainly, as every pedagogue knows, a good way to delay and even confound the questioner until you can think of an ...

"Why Translation Matters argues for the cultural importance of translation and for a more encompassing and nuanced appreciation of the translator's role. As the acclaimed translator Edith Grossman writes in her introduction, "My intention is to stimulate a new consideration of an area of literature that is too often ignored, misunderstood, or misrepresented." For Grossman, translation has a transcendent importance: " Translation not only plays its important traditional role as the means that allows us access to literature originally written in one of the countless languages we cannot read, but it also represents a concrete literary presence with the crucial capacity to ease and make more meaningful our relationships to those with whom we may not have had a connection before. Translation always helps us to know, to see from a different angle, to attribute new value to what once may have been unfamiliar. As nations and as individuals, we have a critical need for that kind of understanding and insight. The alternative is unthinkable."--Jacket.

A New York Times Notable Book for 2011 One of The Economist's 2011 Books of the Year People speak different languages, and always have. The Ancient Greeks took no notice of anything unless it was said in Greek; the Romans made everyone speak Latin; and in India, people learned their neighbors' languages—as did many ordinary Europeans in times past (Christopher Columbus knew Italian, Portuguese, and Castilian Spanish as well as the classical languages). But today, we all use translation to cope with the diversity of languages. Without translation there would be no world news, not much of a reading list in any subject at college, no repair manuals for cars or planes; we wouldn't even be able to put together flat-pack furniture. Is That a Fish in Your Ear? ranges across the whole of human experience, from foreign films to philosophy, to show why translation is at the heart of what we do and who we are. Among many other things, David Bellos asks: What's the difference between translating unprepared natural speech and translating Madame Bovary? How do you translate a joke? What's the difference between a native tongue and a learned one? Can you translate between any pair of languages, or only between some? What really goes on when world leaders speak at the UN? Can machines ever replace human translators, and if not, why? But the biggest question Bellos asks is this: How do we ever really know that we've understood what anybody else says—in our own language or in another? Surprising, witty, and written with great joie de vivre, this book is all about how we comprehend other people and shows us how, ultimately, translation is another name for the human condition.

In recent years, scholarship on translation has moved well beyond the technicalities of converting one language into another and beyond conventional translation theory. With new technologies blurring distinctions between "the original" and its reproductions, and with globalization redefining national and cultural boundaries, "translation" is now emerging as a reformulated subject of lively, interdisciplinary debate. Nation, Language, and the Ethics of Translation enters the heart of this debate. It covers an exceptional range of topics, from simultaneous translation to legal theory, from the language of exile to the language of new nations, from the press to the cinema; and cultures and languages from contemporary Bengal to ancient Japan, from translations of Homer to the work of Don DeLillo. All twenty-two essays, by leading voices including Gayatri Spivak and the late Edward Said, are provocative and persuasive. The book's four sections--"Translation as Medium and across Media," "The Ethics of Translation," "Translation and Difference," and "Beyond the Nation"--together provide a comprehensive view of current thinking on nationality and translation, one that will be widely consulted for years to come. The contributors are Jonathan E. Abel, Emily Apter, Sandra Bermann, Vilashini Cooppan, Stanley Corngold, David Damrosch, Robert Eaglestone, Stathis Gourgouris, Pierre Legrand, Jacques Lezra, Fran ç oise Lionnet, Sylvia Molloy, Yopie Prins, Edward Said, Azade Seyhan, Gayatri Chakravorty Spivak, Henry Staten, Lawrence Venuti, Lynn Visson, Gauri Viswanathan, Samuel Weber, and Michael Wood.

This long-awaited memoir is a joy to read, an instrumental guide to translating, and a look at the life of one of its great practitioners.

A replacement of the author's well-known book on Translation Theory. In Search of a Theory of Translation (1980), this book makes a case for Descriptive Translation Studies as a scholarly activity as well as a branch of the discipline, having immediate consequences for issues of both a theoretical and applied nature. Methodological discussions are complemented by an assortment of case studies of various scopes and levels, with emphasis on the need to contextualize whatever one sets out to focus on.Part One deals with the position of descriptive studies within TS and justifies the author's choice to devote a whole book to the subject. Part Two gives a detailed rationale for descriptive studies in translation and serves as a framework for the case studies comprising Part Three. Concrete descriptive issues are here tackled within ever growing contexts of a higher level: texts and modes of translational behaviour in the appropriate cultural setup; textual components in texts, and through these texts, in cultural constellations. Part Four asks the question: What is knowledge accumulated through descriptive studies performed within one and the same framework likely to yield in terms of theory and practice?This is an excellent book for higher-level translation courses.

Jean Boesse-Beier's Critical Introduction To Translation Studies demonstrates a keen understanding of theoretical and practical translation. It looks to instances where translation might not be straightforward, where stylistics play an important role. Examples are discussed from works of literature, advertisements, journalism and others, where effects on the reader are central to the text, and are reflected in the style. It begins by sitting out some of the basic problems and issues that arise in the study of translation, such as: the difference between literary and non-literary translation; the role of language, content and style; the question of universals and specifics in language and the notion of context. The book then goes on to focus more closely on style and how it enables us to characterise literary texts and literary translation. The final part looks at the translation of poetry. Throughout, it is conscious of the relationship between theory and practice in translation. This book offers a new approach to translation, grounded in stylistics, and it will be an invaluable resource for undergraduates and postgraduates approaching translation studies.

The most comprehensive collection of perspectives on translation to date, this anthology features essays by some of the world's most skillful writers and translators, including Haruki Murakami, Alice Kaplan, Peter Cole, Eliot Weinberger, Forrest Gander, Clare Cavanagh, David Bellos, and Jos é Manuel Prieto. Discussing the process and possibilities of their art, they cast translation as a fine balance between scholarly and creative expression. The volume provides students and professionals with much-needed guidance on technique and style, while affirming for all readers the cultural, political, and aesthetic relevance of translation. These essays focus on a diverse group of languages, including Japanese, Turkish, Arabic, and Hindi, as well as frequently encountered European languages, such as French, Spanish, Italian, German, Polish, and Russian. Contributors speak on craft, aesthetic choices, theoretical approaches, and the politics of global cultural exchange, touching on the concerns and challenges that currently affect translators working in an era of globalization. Responding to the growing popularity of translation programs, literature in translation, and the increasing need to cultivate versatile practitioners, this anthology serves as a definitive resource for those seeking a modern understanding of the craft.

Memes of Translation is a search for coherence in translation theory based on the notion of Memes: ideas that spread, develop and replicate, like genes. The author explores a wide range of ideas on translation, mapping the " meme pool " of translation theory with chapters on translation history, norms, strategies, assessment, ethics, and translator training. The aim of the book is to search for a perspective from which the immense variety of ideas about translation can be related. The unifying thread is the philosophy of Karl Popper. The book proposes the beginnings of a Popperian theory of translation, based on the fundamental concepts of norms, strategies, and values. A key idea is that a translation itself is a theory or hypothesis concerning the source text. This hypothesis is then subjected to testing, refinement, and perhaps even rejection, just like any other hypothesis.

Official translations are generally documents that serve as legally valid instruments. They include anything from certificates of birth, death or marriage through to academic transcripts or legal contracts. This field of translation is now as important as it is fraught with difficulties, for it is only in a few areas that the cultural differences are so acute and the consequences of failure so palpable. In a globalizing world, our official institutions increasingly depend on translations of official documents, but little has been done to elaborate the skills and dilemmas involved. Roberto Mayoral deals with the very practical problems of official translating. He points out the failings of traditional theories in this field and the need for revised concepts such as the virtual document, pragmatic constraints, and risk analysis. He details aspects of the social contexts, ethical norms, translation strategies, different formats, fees, legal formulas, and ways of solving the most frequent problems. Care is taken to address as wide a range of cultural contexts as possible and to stress the active role of the translator. This book is intended as a teaching text for the classroom, for self-learning, or for professionals who want to reflect on their practice. Activities and exercises are suggested for each chapter, and information is included on professional associations and societies across the globe.
