A boot disk (or a startup disk) is a recovery media (CD, DVD or floppy disk for older Windows versions) that you can use to start Windows, if it became damaged or corrupted somehow. The term "boot disk" was mostly used in connection with Windows XP (and older versions) and, in some cases, with Windows Vista. For Windows 7, Windows 8 and Windows 10 the "boot disk" term is mostly replaced with the term "recovery disk" (sometimes also named as a "repair disk" or "restore disk").
