FIELD & STREAM, America's largest outdoor sports magazine, celebrates the outdoor experience with great stories, compelling photography, and sound advice while honoring the traditions hunters and fishermen have passed down for generations.

This book contains most of the papers presented at the 7th International Conference on Environmental Problems in Coastal Regions . The conference provides a forum for the discussion of problems that are related to coastal regions, which are increasingly being affected by population growth and industrial and tourism activities. The pressure of these developments generates social, ecological and economic problems, the solution of which requires an interdisciplinary approach. Effective strategies for the management of coastal areas should therefore consist of dynamic and integrated solutions in order to control their environmental quality. The contributions included in this book are listed in the following sections: Ecology and the Coastal Environment; Coastal Deterioration; Management of Risk; Water Quality Issues; Sediment Transport; Coastal Dunes
